Household Risk Management and Social Protection in Chile, 2005. This publication examines whether a social protection system broadly defined to include policy interventions, public institutions and the regulation of private institutions to address welfare costs of problems such as job loss and extended unemployment, health episodes, old age and life-time poverty exists in Chile or whether it has a set of loosely coordinated programmes instead. It assesses whether households are provided with appropriate tools to mitigate risks to their income, identifies gaps in coverage and sets out guidelines grounded in a conceptual framework designed to increase the effectiveness of social protection. *Reforming Severance Pay* Robert Holzmann, Milan Vodopivec, 2011-10-31. World Development Report 2005 World Bank, 2004 Firms and entrepreneurs of all types from microenterprises to multinationals play a central role in growth and poverty reduction Their investment decisions drive job creation the availability and affordability of goods and services for consumers and the tax revenues governments can draw on to fund health education and other services Their contribution depends largely on the way governments shape the investment climate in each location through the protection of property rights regulation and taxation strategies for providing infrastructure interventions in finance and labor markets and broader governance features such as corruption The World Development Report 2005 argues that improving the investment climates of their societies should be a top priority for governments Drawing on surveys of nearly 30 000 firms in 53 developing countries country case studies and other new research the Report explores questions such as What are the key features of a good investment climate and how do they influence growth and poverty What can governments do to improve their investment climates and how can they go about tackling such a broad agenda What has been learned about good practice in each of the main areas of the investment climate What role might selective interventions and international arrangements play

in improving the investment climate What can the international community do to help developing countries improve the investment climates of their societies In addition to detailed chapters exploring these and related issues the Report contains selected data from the World Bank's new program of Investment Climate Surveys the Bank's Doing Business Project and World Development Indicators 2004 an appendix of economic and social data for over 200 countries This Report offers practical insights for policymakers executives scholars and all those with an interest in economic development

Reforming the Investment Climate Sunita Kikeri, 2006 Most people agree that a good investment climate is essential for growth and poverty reduction Less clear is how to achieve it Many reforms are complex involving more than technical design and content They are both political facing opposition from organized and powerful groups and institutionally demanding cutting across different departments and levels of government Reform thus requires paying as much attention to understanding the politics and institutional dimensions as to policy substance which is the goal of this paper Drawing from more than 25 case studies it shows that there is no single recipe or manual for reform given diverse contexts and serendipity in any reform effort But three broad lessons emerge The first is to recognize and seize opportunities for reform Crisis and new governments are important catalysts but so is the competition generated by trade integration and new benchmarking information The second is to invest early in the politics of reform Central to this process is using education and persuasion strategies to gain wider acceptance and neutralize opponents Pilot programs can be valuable for demonstrating the benefits and feasibility of change And the third is to pay greater attention to implementation and monitoring This does not require full scale public management reforms Reformers can draw on private sector change management techniques to revitalize public institutions responsible for implementation Given the cross cutting nature of reform new oversight mechanisms may be needed to monitor and sustain reform The paper concludes with an emerging checklist for reformers and identifies areas for future work World Bank web site
