*Craftsmen of Necessity* Christopher G. Williams,1974      *Plato and Myth* Catherine Collobert,Pierre Destrée,Francisco J. Gonzalez,2012-02-17 Through the contributions of specialists in the field this volume addresses the still open question of the role and status of myth in Plato s dialogues and thereby speaks to the broader problem of the relation between philosophy and poetic discourse      European Trade and Colonial Conquest Biplab Dasgupta,2005 This first of three volumes focuses on the evolution of Bengal s economy and society before colonisation beginning from pre historic days With no documented or authentic history of Bengal the author examines oral history bringing us a study that uncovers the roots of the many issues in the colonial and post colonial eras      Hearings United States. Ashbaugh,1988-03-01 Here is the question what constitutes a good explanation of phenomena Whereas true being forms can be known through dialectic concrete phenomena can only be explained An explanation is verisimilar of dialectical knowledge as concrete things are images of eternal ones Ashbaugh shows how Plato subtly develops the notion of imaging and explaining accounting for how physical things can be different from forms and how they are connected to forms      *Hearings* United States. **Values and Technology** Gabriel R. Ricci,2011-12-31 In 1749 Jean Jacques Rousseau s Discourse on the Arts and Sciences surprised leading Enlightenment thinkers who had enthusiastically upheld the positive benefits of humanity s technological advance Voltaire who celebrated the ends of civilization mocked Rousseau s praise for an original creative state of nature in which man enjoyed an optimum level of freedom Given the unprecedented intrusion of technology into our lives the question raised by Rousseau s critique may be even more pertinent In this volume of Religion and Public Life contributors address some of the challenges to conventional morality brought on by the technological augmentation of the social structure

John Barker's essay explores how Luciano Floridi's philosophy of technology has complicated the conventional way of determining what ought to receive moral consideration. Fani Zlatarova provides a practical guide for incorporating ethical components into teaching computer technology. Grant Havers explores the controversies surrounding the biogenetic explosion through an examination of the competing philosophical perspectives, and Christopher Vassilopoulos examines the science-based justification for taking life. Gabriel R. Ricci looks at recent political history in the United States in order to highlight the sometimes uneasy relationship between science and social policy. Volume 37 is a welcome addition to the acclaimed Religion and Public Life series.

**The Emerald Handbook of African Studies** Kingsley Obi Omeihe, Christian Harrison, 2025-08-25 The Emerald Handbook of African Studies forces one to rethink the very nature of African research serving as a catalyst for new fresh thought and acuminating our understanding of the social world.

**Arts & Crafts Homes and the Revival**, 2006 Devoted to the Arts and Crafts Movement past and present this new magazine celebrates the revival of quality and craftsmanship. Each issue is a portfolio of the best work in new construction, restoration and interpretive design presented through intelligent writing and beautiful photographs. Offering hundreds of contemporary resources it showcases the work not only of past masters but also of those whose livelihoods are made in creating well-crafted homes and furnishings today. The emphasis is on today's revival in architecture, furniture and artisanry informed by international Arts & Crafts and the early 20th century movement in America. William Morris through the Bungalow era. Includes historic houses, essays and news, design details, how-to articles, gardens and landscape, kitchens and baths. Lots of expert advice and perspective for those building, renovating or furnishing a home in the Arts & Crafts spirit. **Inventing the Industrial Revolution** Christine MacLeod, 2002-05-09 This book examines the development of the English patent system and its relationship with technical change during the period between 1660 and 1800 when the patent system evolved from an instrument of royal patronage into one of commercial competition among the inventors and manufacturers of the Industrial Revolution. It analyses the legal and political framework within which patenting took place and gives an account of the motivations and fortunes of patentees who obtained patents for a variety of purposes beyond the simple protection of an invention. It includes the first in-depth attempt to gauge the reliability of the patent statistics as a measure of inventive activity and technical change in the early part of the Industrial Revolution and suggests that the distribution of patents is a better guide to the advance of capitalism than to the centres of inventive activity. It also queries the common assumption that the chief goal of inventors was to save labour and examines contemporary criticism of the patent system in the light of the changing conceptualisation of invention among natural scientists and political economists.

*Creating the Land of the Sky* Richard D. Starnes, 2010-03-12 A sophisticated inquiry into tourism's social and economic power across the South. In the early 19th century, planter families from South Carolina, Georgia and eastern North Carolina left their low country estates during the summer to relocate their households to

vacation homes in the mountains of western North Carolina Those unable to afford the expense of a second home relaxed at the hotels that emerged to meet their needs This early tourist activity set the stage for tourism to become the region s New South industry After 1865 the development of railroads and the burgeoning consumer culture led to the expansion of tourism across the whole region Richard Starnes argues that western North Carolina benefited from the romanticized image of Appalachia in the post Civil War American consciousness This image transformed the southern highlands into an exotic travel destination a place where both climate and culture offered visitors a myriad of diversions This depiction was further bolstered by partnerships between state and federal agencies local boosters and outside developers to create the attractions necessary to lure tourists to the region As tourism grew so did the tension between leaders in the industry and local residents The commodification of regional culture low wage tourism jobs inflated land prices and negative personal experiences bred no small degree of animosity among mountain residents toward visitors Starnes s study provides a better understanding of the significant role that tourism played in shaping communities across the South

Rural Life and Culture in the Upper Cumberland Michael E. Birdwell, W. Calvin Dickinson, 2004-12-24 Tennessee History Book Award Finalist The Upper Cumberland region of Kentucky and Tennessee often regarded as isolated and out of pace with the rest of the country has a far richer history and culture than has been documented The contributors to Rural Life and Culture in the Upper Cumberland discuss an extensive array of subjects including popular music movies architecture folklore religion and literature Seventeen original essays by prominent scholars such as Lynwood Montell Charles Wolfe Allison Ensor and Jeannette Keith uncover fascinating stories and personalities as they explore topics including wartime hero Alvin C York Socialist Party Tennessee gubernatorial candidate Kate Brockford Stockton and even a thriving nudist colony the Timberline Lodge
