Crazy Lyonnais:

Free to Fail Arjen van Witteloostuijn, Hugh C. van der Mandele, 2013-01-01 This challenging book tackles one of the most fundamental questions in economics Why are commercial organizations more efficient than organizations in the public domain It is generally accepted that the traditional answer the fact that commercial organizations maximize profits does not necessarily hold true Finding a solution to this anomaly as this book attempts to do should therefore be a prime concern in economics The authors believe the answer lies in the fact that even in a completely stable environment all organizations will eventually fail irreparably Organizations operating in the market are more efficient because once in decline they are free to fail and allowed to be disassembled or even replaced Public organizations that fail are more often than not protected and allowed to continue even though their efficiency is questionable This fascinating and thought provoking book will provide a stimulating read for academics and students with an interest in economics business and management and public policy

The Downsizing of Asia François Godement, 2012-12-06 Until very recently it was assumed that the Asian miracle of prodigious economic growth would continue indefinitely Europe and America it seemed were being left behind The recent financial crisis in Asia has now changed all that François Godement provides a broad ranging survey of the regions economies since 1993 and explains the main reasons behind the recent financial crisis He also examines important factors such as demography Asian values crony capitalism industrial groupings and the wane of political authority The Asian miracle has not come to an end but the author makes clear that improved self regulation and discipline within the financial sector will be crucial if the economies of the region are to weather the uncertainties of the marketplace in the future and realize their full potential

Maclean,2002-10-02 How is it that the modest pace of change which typified the French economy a century ago gave way after 1945 to a new revived capitalism and a superior economic performance Maclean traces the development of French economic and business life in the context of the European and international economy over the past fifty years She examines the main economic trends and events from nationalization to privatization from war with Germany to reconciliation and ever greater union from the franc to the euro and from national champions to mega mergers with foreign companies Maclean argues that the new French capitalism of the twenty-first century is the product of an ideological struggle in which the forces of modernization triumphed over the old guard of French nationalism
