## **Creating Better Cities With Children And Youth A Manual For Participation:**

**Creating Better Cities with Children and Youth** David Driskell, 2017-07-28 *Creating Better Cities with Children and Youth* is a practical manual on how to conceptualize structure and facilitate the participation of young people in the community development process. It is an important tool for urban planners, municipal officials, community development staff, non-governmental organizations, educators, youth serving agencies, youth advocates, and others who are involved in the community development process. It offers inspiration to all who believe in the value of community education and empowerment as a fundamental building block of a vibrant and resilient civil society, and those who feel concern for young people and the quality of their lives. The manual's core ideas and methods have been field tested in a wide range of urban settings in both developing and industrialized cities through the work of the UNESCO Growing Up in Cities project. Case studies from project sites help to demonstrate the methods in action and show how they can be customized to meet local needs. They provide lessons and insights to help ensure a successful project and highlight the universal applicability and value of young people's participation. *Creating Better Cities with Children and Youth* David Driskell, 2002 *Creating Better Cities with Children and Youth* David Driskell, 2002 *Designing Cities with Children and Young People* Kate Bishop, Linda Corkery, 2017-05-25 *Designing Cities with Children and Young People* focuses on promoting better outcomes in the built environment for children and young people in cities across the world. This book presents the experience of practitioners and researchers who actively advocate for and participate with children and youth in planning and designing urban environments. It aims to cultivate champions for children and young people among urban development professionals to ensure that their rights and needs are fully acknowledged and accommodated. With international and interdisciplinary contributors, this book sets out to build bridges and provide resources for policy makers, social planners, design practitioners, and students. The content moves from how we conceptualize children in the built environment, what we have discovered through research, how we frame the task and legislate for it, and how we design for and with children. *Designing Cities with Children and Young People* ultimately aims to bring about change to planning and design policies and practice for the benefit of children and young people in cities everywhere. **A Handbook of Children and Young People's Participation** Barry Percy-Smith, Nigel Patrick Thomas, 2009-09-10 *A Handbook of Children and Young People's Participation* brings together key thinkers and practitioners from diverse contexts across the globe to provide an authoritative overview of contemporary theory and practice around children's participation. Promoting the participation of children and young people in decision making and policy development, and as active contributors to everyday family and community life, has become a central part of policy and programme initiatives in both majority and minority worlds. This book presents the most useful recent work in children's participation as a resource for academics, students, and practitioners in childhood studies, children's rights, and welfare, child and family social work, youth and community work, governance, aid, and development programmes. The book

introduces key concepts and debates and presents a rich collection of accounts of the diverse ways in which children's participation is understood and enacted around the world interspersed with reflective commentaries from adults and young people. It concludes with a number of substantial theoretical contributions that aim to take forward our understanding of children's participation. The emphasis throughout the text is on learning from the complexity of children's participation in practice to improve our theoretical understanding and on using those theoretical insights to challenge practice with the aim of realising children's rights and citizenship more fully.

Handbook of Children and Youth Studies Johanna Wyn, Helen Cahill, Hernán Cuervo, 2024-08-20 This second edition of the handbook gives a new scientific perspective to youth and childhood studies as multi scientific and interdisciplinary subjects which as such have not yet found their own framing in a particular discipline. It provides theoretical and methodological key debates and issues that develop and add an understanding of childhood and youth research discipline from a broader perspective. The Handbook on Children and Youth Studies draws on current thinking but also challenges theoretical and conceptual orthodoxies in the field drawing on interdisciplinary thinking and critical perspectives. It focuses on childhood and youth to address the emerging consensus that the boundaries between childhood youth and adulthood are blurred. The view that defining youth and childhood largely in terms of problem topics is out dated. Instead the handbook focuses on 16 themes that are open to international perspectives and to different conceptual approaches. Each theme is edited by a pair of field editors thereby capturing a plurality of views. The 16 themes as a starting point are globally timely and they need scientific debates on the boundaries between childhoods youth and adulthood. This handbook will meet the needs of childhood and youth researchers and the academics in the field. It recognizes the changing social context of the lives of children and young people while developing theoretical frameworks and discussing about the core substantive issues of Children and Youth Studies.

*Education in Times of Environmental Crises* Ken Winograd, 2016-04-14 The core assumption of this book is the interconnectedness of humans and nature and that the future of the planet depends on humans recognition and care for this interconnectedness. This comprehensive resource supports the work of pre service and practicing elementary teachers as they teach their students to be part of the world as engaged citizens advocates for social and ecological justice. Challenging readers to more explicitly address current environmental issues with students in their classrooms the book presents a diverse set of topics from a variety of perspectives. Its broad social cultural perspective emphasizes that social and ecological justice are interrelated. Coverage includes descriptions of environmental education pedagogies such as nature based experiences and place based studies peace education practices children doing environmental activism and teachers supporting children emotionally in times of climate disruption and tumult. The pedagogies described invite student engagement and action in the public sphere. Children are represented as agents of change engaged in social and environmental issues and problems through their actions both local and global.
