Modern** Michael Boyd, 2018-04-03 This is the definitive volume on Craig Ellwood a visionary architect designer and tastemaker often called the California Mies van der Rohe Craig Ellwood the Cary Grant of architecture was one of the most visible faces of California mid century modernism He was known as much for his exquisitely designed minimalist structures as he was for his exuberant lifestyle This book celebrates and explores the glamour of Ellwood s work life myth and career Through photographs primarily of the iconic houses he designed in Southern California during the 1950s and 60s we see a life of refined decadence expressed through gorgeous architecture fast cars beautiful women Hollywood style palm trees swimming pools and minimalist design all in the context of the Southern California postwar building boom This volume will appeal to design junkies architecture buffs students of modernism and anyone interested in problem solving and elegant solutions

California Modern , 2002 **Craig Ellwood** Alfonso Pérez-Méndez, 2002 All but forgotten today Craig Ellwood was one of the finest California architects of the postwar era By the time he was thirty he had already contributed three of the seminal Case Study Houses and received the S o Paulo Award for his Courtyard Apartments Subsequently influenced by Mies he went on to design a lengthy series of stark minimalist structures peaking with the Pasadena Art Center a masterpiece among architecture of a Miesian persuasion With the support of John Entenza editor of the influential magazine Arts Architecture he was until the late 1960s widely considered as one of the most innovative American architects of the period This book documents all the Ellwood buildings that remain on the records a total of some ninety structures Its 600 illustrations include comprehensive archival photography including Ellwood s own pictures and others by Julius Shulman original drawings and for those buildings that remain in good condition recent images Due to the loss of most of the original drawings 80 floor plans have been redrawn for this publication making this book as close a record of Ellwood s complete works as is possible today Craig Ellwood Craig Ellwood, 2004 With *Craig Ellwood 15 Houses* we start reprinting in hardcover book format the issues of the 2G Architecture Review that have been out of print Craig Ellwood s career was extensive including over one hundred documented buildings Houses were Ellwood s beginning and the origin of his experimentation And since he designed domestic architecture up to the later years the houses provide a comprehensive view of his career Ellwood s residential work also benefited from the experimentation in his commercial architecture The selection has been marked by the state of conservation of the houses Fortunately the number of them in good shape represent the breadth of Ellwood s career The publication of all this material rather than undermining the tale that Ellwood told of himself demonstrates the high standard he maintained throughout his production Craig Ellwood Clarendon Texas 1922 was one of

the architects who during the 50s took part alongside Charles Eames Pierre Koenig and Rafael Soriano among others in the celebrated Case Study Houses programme organized by the Arts Architecture magazine with the aim of promoting modern architecture and experimentation with new industrial materials in domestic architecture Ellwood's relatively short professional career spanned the years from 1948 to 1977 when he retired at the age of 55 [California Modern](#) Neil Jackson,2002 In the 1950s a series of dramatic open and elegant homes made him a media star and interest in the work of his atelier has only increased over time **Craig Ellwood** Craig Ellwood,2004 **The Modern Steel House** Neil Jackson,2016-03-23 This book provides a comprehensive survey of Modern Movement houses constructed with steel frames Arranged chronologically and thematically it traces the development over the last seventy years of steel houses in Europe Australia and the United States with special reference to London Paris Sydney and Los Angeles and to the work elsewhere of Mies van der Rohe Philip Johnson and Jean Prouve Examples of steel houses from around the world demonstrate that steel structures can provide a better quality of life within a cleaner lighter home environment *Encyclopedia of Twentieth Century Architecture* R.
