The Role of the 1929 Stock Market Crash and Other Factors that Caused the Great Depression Dennis Sauert,2010-09
 Bachelor Thesis from the year 2009 in the subject Economics History grade 1 3 Berlin School of Economics and Law
 language English abstract Within macroeconomics economists agree that there were a number of contributing factors that led to the Great Depression However most of the discussion is about what was responsible for the depth and the length of this economic event In the four years starting in the summer of 1929 until 1933 financial markets and institutions labor markets as well as international currency and goods markets had stopped functioning and it seemed that economic and monetary policy remained helpless in that period To analyze the Great Depression Friedman and Schwartz supply one of the most critical but popular explanations They focus on the monetary policy of the Federal Reserve System hereinafter Fed of the United States hereinafter U S since the Fed allowed a severe contraction in money supply in the period of 1929 1933 even though the Federal Reserve Act of 1913 delegated monetary actions by the Fed to avoid such monetary contraction Friedman and Schwartz claim that the severeness of monetary contraction resulted from the Fed s passive response to the banking panics in the 1930s when the public increased sharply its demand for currency However they admit that the Fed conducted a successful policy during most of the 1920s until a shift in power within the system and the lack of understanding and experience of those individuals to whom the power shifted occurred Herein they point to the death of Benjamin Strong the Governor of the New York Federal Reserve Bank who had the sagacity and leadership to take measures that would have avoided the Great Depression Thus they maintain that monetary contraction in the period of 1929 1933 induced the Great Depression due to a misguided policy by the Fed that was eventually in authority for the downturn in economic activity

more overpriced in the current era of staggering growth in stock prices and investment in securities The causes of the 1929 crash Bierman argues lie in an unfavorable decision by the Massachusetts Department of Public Utilities coupled with the popular practice known as debt leverage in the 1920s corporate and investment arena This book extends Bierman s argument in an earlier book The Great Myths of 1929 and the Lessons to Be Learned Greenwood 1991 in which he discussed and refuted seven myths about 1929 but could not explain the crash He now believes he has a reasonable explanation He also examines the actions of Charles E Mitchell and Sam Insull and their subsequent unjust criminal prosecution after the crash of the 1929 stock market **GREAT 1929 STOCK MARKET CRASH** DOUG.
