Cerulo,2008-09-15 People especially Americans are by and large optimists They re much better at imagining best case scenarios I could win the lottery than worst case scenarios A hurricane could destroy my neighborhood This is true not just of their approach to imagining the future but of their memories as well people are better able to describe the best moments of their lives than they are the worst Though there are psychological reasons for this phenomenon Karen A Cerulo in Never Saw It Coming considers instead the role of society in fostering this attitude What kinds of communities develop this pattern of thought which do not and what does that say about human ability to evaluate possible outcomes of decisions and events Cerulo takes readers to diverse realms of experience including intimate family relationships key transitions in our lives the places we work and play and the boardrooms of organizations and bureaucracies Using interviews surveys artistic and fictional accounts media reports historical data and official records she illuminates one of the most common yet least studied of human traits a blatant disregard for worst case scenarios Never Saw It Coming therefore will be crucial to anyone who wants to understand human attempts to picture or plan the future In Never Saw It Coming Karen Cerulo argues that in

American society there is a positive symmetry a tendency to focus on and exaggerate the best the winner the most optimistic outcome and outlook Thus the conceptions of the worst are underdeveloped and elided Naturally as she masterfully outlines there are dramatic consequences to this characterological inability to imagine and prepare for the worst as the failure to heed memos leading up to both the 9 11 and NASA Challenger disasters for instance so painfully reminded us Robin Wagner Pacifici Swarthmore College Katrina 9 11 and the War in Iraq all demonstrate the costliness of failing to anticipate worst case scenarios Never Saw It Coming explains why it is so hard to do so adaptive behavior hard wired into human cognition is complemented and reinforced by cultural practices which are in turn institutionalized in the rules and structures of formal organizations But Karen Cerulo doesn t just diagnose the problem she uses case studies of settings in which people effectively anticipate and deal with potential disaster to describe structural solutions to the chronic dilemmas she describes so well Never Saw It Coming is a powerful contribution to the emerging fields of cognitive and moral sociology Paul DiMaggio Princeton University   **Computer Security – ESORICS 2016** Ioannis Askoxylakis,Sotiris Ioannidis,Sokratis Katsikas,Catherine Meadows,2016-09-14 The two volume set LNCS 9878 and 9879 constitutes the refereed proceedings of the 21st European Symposium on Research in Computer Security ESORICS 2016 held in Heraklion Greece in September 2016 The 60 revised full papers presented were carefully reviewed and selected from 285 submissions The papers cover a wide range of topics in security and privacy including data protection systems security network security access control authentication and security in such emerging areas as cloud computing cyber physical systems and the Internet of Things
