Crc Handbook Series In Nutrition And Food Section E Volume 1:

The Vitamins J. Marks, 2012-12-06 This book has been designed as its title implies as a practical book for medical practitioners although it should be of interest to medical students and nutritionists It attempts to provide essential information about this important group of substances rather than be an all embracing monograph on the subject For this reason biochemical and physiological considerations have been kept to a minimum and aspects of animal disorders and animal husbandry have not been considered The material is often presented in a rather dogmatic fashion and with rare exceptions references are not included since this makes reading more difficult The exceptions where references are provided are the therapeutic claims and the series of recent studies which have indicated that vitamin deficiencies are still widely present among certain groups of the population of many industrially developed countries To add to this reference list there is a reading list which has been selected to give key books reviews with extensive bibliography and important articles over the past 10 years From this reading list it is possible to trace most of the literature on the vitamins since they were first described over half a century ago

Textbook of Natural Medicine - E-Book Joseph E. Pizzorno, Michael T. Murray, 2012-09-06 Covering preventive non invasive and natural treatments Textbook of Natural Medicine 4th Edition offers more than just alternative medicine It promotes an integrated practice that can utilize natural medicine traditional Western medicine or a combination of both in a comprehensive scientific treatment plan Based on a combination of philosophy and clinical studies Textbook of Natural Medicine helps you provide health care that identifies and controls the underlying causes of disease is supportive of the body's own healing processes and is considerate of each patient's unique biochemistry Internationally known authors Joseph Pizzorno and Michael Murray include detailed pharmacologic information on herbs and supplements plus evidence based coverage of diseases and conditions to help you make accurate diagnoses and provide effective therapy Comprehensive unique coverage makes this book the gold standard in natural medicine A scientific presentation includes the science behind concepts and treatments and discusses Western medical treatments and how they can work with natural medicine in a comprehensive treatment plan if natural medicine is not effective this book recommends the Western treatment Coverage of pharmacology of natural medicines includes the uses and potential dangers of nearly 80 herbal medicines special nutrients and other natural agents addressing topics such as general information chemical composition history pharmacology clinical applications dosage and toxicology In depth evidence based coverage of 73 diseases and conditions includes key diagnostic criteria pathophysiology of diseases and therapeutic rationales Coverage of potential interactions between drugs herbs and supplements ensures the safest possible use for each of 79 herbs and supplements Diagnostic procedures include practical easy to follow descriptions of evidence based techniques plus discussions of clinical application of diet analysis food allergy testing immune function assessment fatty acid profiling hair mineral analysis and other diagnostic approaches Common therapeutic modalities are described and reviewed including

botanical medicine nutritional therapy therapeutic fasting exercise therapy hydrotherapy counseling acupuncture homeopathy and soft tissue manipulation Coverage of syndromes and therapies helps in understanding the underlying causes of diseases by discussing topics such as food reactions functional toxicology sports nutrition stress management and breathing pattern disorders Coverage of the philosophy of natural medicine includes its history and background with discussions of toxicity detoxification and scientific documentation of the healing actions of nature and natural substances Internationally known authors Joseph Pizzorno and Michael Murray and more than 90 expert contributors provide material that is up to date accurate and informed More than 10 000 research literature citations show that the content is based on science rather than opinions or anecdotes 13 useful appendices offer quick lookup of frequently used charts handouts and information **Current Catalog** National Library of Medicine (U.S.),1983 First multi year cumulation covers six years 1965
