Proceeding Book of Proceeding Indonesian Textile Conference : textile 4.0 clothing and beyond (international conference) Asril Senoaji Soekoco, Karlina Somantri,Valentinus Galih Vidia Putra,2019-07-27

Welcome to the 3rd Indonesian Textile Conference ITC 2019 It is our great honor and pleasure to have you all here today Indonesian Textile Conference is by far the only scientific event in the field of textiles in Indonesia aimed to bring together leading researchers experts students and people from the industry to share their knowledge and exchange scientific ideas Indonesia is one of the leading textile exporter countries in the world with a total export value of USD 15 3 billion in 2015 and ranked the third after palm oil and steel source Ministry of Industry of Republic of Indonesia It is one of the ten priority industries and the mainstay of Indonesian national industry In a global economy and fast changing world the future of Indonesian textile industry will increasingly depend on the industry s ability to relentlessly innovate in its products to use the most advanced flexible and resource efficient processes and to focus its organizational structure as well as business operations according to the ever changing and growing needs of its customers In all that research and innovation are vital and play an ever increasing role Indonesian Textile Conference was initiated and is dedicated to promote and bring progress to research and innovation in the field of textile and textile related subjects in Indonesia Textile is a rich multidisciplinary area of study and in fact has attracted a great deal of attention and numerous contributions from non textile scientists It is not just about clothing It is all about material and all aspects that are inherent in the process of its production and applications It covers a whole lot of area which includes but not limited to advanced material and textile fibers natural fibers and natural dyes utilization of natural sources for textiles in general and or functional textiles environmental protection and ecological considerations in textile industry life cycle analysis clean green production best practices in energy efficient processes bio based polymer bioengineering nanotechnology textile based composites industrial management and engineering traditional textiles and batik textile preservation and conservation and design Smart functional and interactive textile is another area of interest which is quite recent and resulted from the convergence of latest developments in material science physics and chemistry microelectronics and informatics Stimuli responsive materials self healing polymers textile energy devices textile sensor and antenna are only a few examples of development in this area Recently added to this is a new emerging fashionable technology It is a new concept that brings fashion to the next level by integrating technology and fashion It looks at the future fashion as intersection of design fashion science and technology beyond wearable technology Still another important and interesting issue in textile is sustainability especially due to the stigma associated with the industry as the big polluter and being not environmentally friendly Sustainable textiles and clothing involves the choice of

materials technologies and processing methods that ensure environmental and social friendliness and safety to human health throughout the entire life cycle phases Thus there is an ample room for almost everyone to contribute in this conference On behalf of the Organizing Committee and the management of Politeknik STTT Bandung have a productive and fruitful conference

Chemistry of Textile Fibres Robert R Mather, Roger H Wardman, Sohel Rana, 2023-09-25 Ever wondered why a particular type of fibre is used for a certain application Readers of this book will gain an appreciation of the answer to this question and more through understanding the chemistry behind the properties of the fibres Providing a comprehensive overview of the various types of textile fibres that are available today ranging from natural fibres to high performance fibres that are very technologically advanced the book is a revised and updated new edition of a highly successful text Textiles are ubiquitous materials that many of us take for granted in our everyday lives We rely on our clothes to protect us from the environment and use them to enhance our appearance Textiles also find applications in transport healthcare construction and many other industries The third edition of The Chemistry of Textile Fibres updates a significant amount of the information provided in the previous editions such as the synthesis from renewable resources of monomers for producing synthetic fibres emerging applications of nanofibres production of electrically conducting fibres incorporating graphene and carbon nanotubes and nano finishing of textiles It also gives greater emphasis to those aspects of textile chemistry that combat adverse environmental impact including the chemical decomposition of synthetic polymers and strategies to reduce the damaging impact of microfibers It introduces the production of micro and nanomaterials from cellulose as an alternative to relatively toxic and non ecofriendly micro and nanomaterials produced from other sources together with the bio functionalisation of textiles Students following A level courses or equivalent and first year undergraduate students reading textile technology subjects at university will find this book a valuable source of information
