The Learner-Centered Classroom Jeanette Campos, 2014-07-02 Learner centered instruction helps build dynamic classrooms in which the student takes ownership of the content and determines ways that it may be useful to him. Such instruction also encourages the student to build the relationships that will allow learning to endure beyond the training event. Here are a few of the questions author Jeannette Campos suggests asking yourself to effectively create a learner centered classroom. As an instructor am I encouraging interaction among my learners whenever possible? Is my content formatted in the most engaging way? Have I created opportunities for the learner to reflect on the learning process? Only in a learner centered classroom can you foster the four types of learning relationships: learner to instructor, learner to content, learner to learner, and learner to self. This TD at Work will explain the four relationships within a classroom, whether online or face to face, the qualities of healthy high performing classroom relationships, how different teaching methods, for example podcasts, peer review, and asking questions, can strengthen learner centered relationships, the four part learning objectives to design learner centered instruction.

To help educators accomplish the goals of learner centered teaching, this important book presents the meaning, practice, and ramifications of the learner centered approach and how this approach transforms the college classroom environment. *Learner Centered Teaching* shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

Helping Students Learn in a Learner-Centered Environment Terry

Doyle,2023-07-03 Before entering higher education most students learning experiences have been traditional and teacher centered Their teachers have typically controlled their learning with students having had little say about what and how to learn For many students encountering a learner centered environment will be new possibly unsettling and may even engender resistance and hostility Taking as his starting point students attitudes toward and unfamiliarity with learner centered classrooms Terry Doyle explains that motivating students to engage with this practice first of all requires explaining its underlying rationale and then providing guidance on how to learn in this environment This book is about how to help students acquire the new skills and knowledge they need to take on unfamiliar roles and responsibilities It is informed by the author s extensive experience in managing learner centered classes and by his consultation work with faculty The first four chapters focus on the importance of imparting to students the evidence and underlying philosophy that is driving higher education to move from a teacher centered to a learner centered practice and what this means for students in terms of having control over and making important choices about their learning The final eight chapters focus on how to impart the skills that students need to learn or hone if they are to be effective learners in an environment that is new to them The book covers such practices as learning on one s own creating meaningful learning when collaborating with others peer teaching making presentations developing life long learning skills self and peer evaluation and give meaningful feedback This book provides a rich and informative answer to the fundamental question how do I help my students adjust to a learner centered practice

Learner-Centered Teaching Terry Doyle,2023-07-03 This book presents the research based case that Learner Centered Teaching LCT offers the best means to optimize student learning in college and offers examples and ideas for putting it into practice as well the underlying rationale It also starts from the premise that many faculty are much closer to being learner centered teachers than they think but don t have the full conceptual understanding of the process to achieve its full impact There is sometimes a gap between what we would like to achieve in our teaching and the knowledge and strategies needed to make it happen LCT keeps all of the good features of a teacher centered approach and applies them in ways that are in better harmony with how our brains learn It for instance embraces the teacher as expert as well as the appropriate use of lecture while also offering new effective ways to replace practices that don t optimizing student learning Neuroscience biology and cognitive science research have made it clear that it is the one who does the work who does the learning Many faculty do too much of the work for their students which results in diminished student learning To enable faculty to navigate this shift Terry Doyle presents an LCT based approach to course design that draws on current brain research on cognition and learning on addressing the affective concerns of students on proven approaches to improve student s comprehension and recall on transitioning from teller of knowledge to a facilitator of learning on the design of authentic assessment strategies such as engaging students in learning experiences that model the real world work they will be asked to do when they graduate and on successful communication techniques The presentation is informed by the

questions and concerns raised by faculty from over sixty colleges with whom Terry Doyle has worked and on the response from an equal number of regional national and international conferences at which he has presented on topics related to LCT
