Creating Capital Markets In Central And Eastern Europe:

Creating Capital Markets in Central and Eastern Europe Gerhard Pohl, Grzegorz J?drzejczak, Robert Edward Anderson, 1995-01-01 Addresses the challenge Hungary faces in overcoming threatening deficits in its current and fiscal accounts without hampering economic growth The Hungarian economy is emerging from a severe four year recession with positive developments on numerous economic fronts but with major weaknesses remaining because of large current and fiscal account deficits This book addresses the challenge Hungary faces in overcoming these deficits without hampering economic growth The report examines the country s macroeconomic performance in the first half of the 1990s and the stabilization package launched in March 1995 It explores the structure of fiscal revenues pension reform and enterprise and banking reforms The study also looks at the impact of structural reforms on future economic growth and at Hungary s bid to integrate with the European Union

The New Capital Markets in Central and Eastern Europe Michael Schröder, 2012-12-06 It is the aim of this study to assess the effects of the EU enlargement on the capital markets in the most advanced countries of Central and Eastern Europe CEE and Russia and to analyse the impacts on the interactions between Eastern and Western capital markets due to the integration process Therefore this study should be particularly useful for financial analysts institutional investors and academic researchers who are interested in the economic and institutional developments of capital markets in CEE countries and are looking for a thorough and comprehensive analysis of the future perspectives of these capital markets The European Union has opened negotiations for EU membership in early 1998 with five CEE countries the Czech Republic Estonia Hungary Poland and Slovenia In autumn 1999 the group of CEE countries involved in the negotiations for EU membership has been enlarged by Bulgaria Latvia Lithuania Romania and Slovakia The negotiations with some of the CEE countries have already reached a stage that makes entry into the EU in the next few years very likely The joining countries have to adopt the whole *acquis communautaire* which represents the legislative framework common to all EU members Important parts of the *acquis communautaire* e g the liberalisation of capital movements European Monetary Union the free provision of bank and non bank financial services and new rules for prudential supervision directly and indirectly affect the behaviour of the financial sector and the functioning of capital markets

World Development Report 1996, 1996 Almost one third of the world s population has embarked on a transition from planned to market economies Like economic reforms elsewhere the long term goal of this transition is to build a thriving market economy capable of delivering long term growth in living standards Now in its 19th annual edition the World Development Report 1996 takes an in depth look at these transition countries focusing on the key lessons that have taken place thus far The introduction to the Report poses a number of key questions that are addressed in later chapters including questions relating to initial challenges and how countries have tackled them from very different starting points and political conditions The Report also focuses on the additional challenges these transition countries face with a final chapter that summarizes the main conclusion of the Report creating a text that will no doubt become the definitive source for students studying international economics and politics

Emerging Financial Markets In The Global Economy David Nickerson, Larry Sawers, Daniel Schydlowsky, 2000-03-24 The rapid emergence of active financial markets in a number of developing and transition countries during the 1990s is a momentous phenomenon Until recently most developing countries severely manipulated and repressed their financial markets The dramatic increase in the influence of neo liberal thinking and laissez faire governance in developing countries has recently led to serious capital market reform in scores of countries Most countries without financial market reform are anxiously studying their successful neighbors in order to adopt policies programs and regulations that have a proven track record This collection of papers addresses many of the important issues raised by these dramatic changes including restructuring pension systems organizing new equity markets designing financial systems to deal with systemic risk dealing with the overhang and bad debts and attracting foreign direct investments Several papers deal with informal credit markets examining the effect of informal finance on economic development and the exponential growth in microfinance by private financial institutions in Latin America and in the United States The book is

intended for policy makers and scholars interested in capital markets in developing and transition economies It is also suitable for use as a supplementary text in upper level undergraduate and graduate courses in development finance
