Thomas Robson (engraver.)

Arizona Alphabet:

G is for Grand Canyon Barbara Gowan, 2010-10-08 Yes the magnificent Grand Canyon sprawls across northwestern Arizona Many of us have been there and many of us will visit it soon but how much do we know about the rest of this southwestern state Author Barbara Gowan and illustrator Katherine Larson help elementary aged students and older readers alike discover the wonders of the Grand Canyon State through rich images informative expository text and simple rhymes G is for Grand Canyon's multi tiered approach to educating and entertaining assures that this fall thousands of readers will travel through pages from A to Z in and around and beyond the Grand Canyon The A-Z of Life K. J. DeMonte, 2003 The book was originally written for my Children and Grandchildren It was to offer advice and help develop their outlook on life generally Using the Alphabet positively with words significant to the challenges in family life and also to have some thoughts on the have nots in the World around us The Alphabet as we know it as A B C has a wealth of words formed that we use in the day to day communication with each other starting and ending with each Alphabet The simplicity was to use familiar words that each and every one of us understand and to make a point of showing their significance and the important part they play in our lives **AZ** Jasna Horvat, The plot of the novel takes place in the 9th century at the time of the brothers Constantine Cyril and Methodius from Salonica The central figure of the novel is Constantine the Philosopher the creator of a new Glagolitic alphabet composed of characters having both numeric and symbolic value Constantine found the inspiration for Glagolitic letters in the Mill Game that he had played since his childhood all around In the same way as Constantine's application of rosette pattern and its various line drawings in his creation of Glagolitic letters confirms the importance of combinatory skill so does the novel as a whole which has been structured taking into consideration numerical values of Glagolitic letters and numbered accordingly confirm the importance of game as such The plot of the novel takes place in Istanbul Kerson Moravia Dalmatia Venice and Rome Constantine's life story is introduced from different perspectives and in different ways by four narrators Methodius Empress Theodora Anastasius the Librarian and the Croatian prince Mutimir The first chapter Ones of the Diary of Methodius has been written in a diary format in which Constantine's brother Methodius reveals the way he perceives his younger brother his love and care for him childhood memories Constantine's talent and dedication to the quest for knowledge and truth as well as his obsession with the hallucination girl Sofia In the second chapter Tens of Theodora the Empress the narrator is Theodora Here we learn about Constantine's mission Saracens and Khazars their customs and about Theodora herself the Byzantine empress her family as well as the situation at the court of Magnaura Besides being torn between her deepest feelings love guilt pain disappointment for her late husband Theophilus and children four daughters and a son Theodore discovers the feelings she didn't know existed for Constantine the Philosopher In addition to longing and tenderness she feels for him in Constantine she also recognizes her tragically deceased firstborn son of the same name The third chapter Hundreds of Anastasius the Librarian takes place in Rome at the

time when the legend about Constantine's Christian mission in Kherson was being created For the purpose of writing the *Legenda Italica* Anastasius gets to know Constantine's personality which he communicates to the young John Archdeacon in their everyday conversations Anastasius reveals himself in an inseparable connection with his cat Acute Thousands of a Gebalim is the final chapter of the novel which presents the Croatian ruler Mutimir in conversations with his son Tomislav the prospective Croatian king In the Glagolitic alphabet Tomislav in the same way as Constantine reveals the game of mill and by spelling the Glagolitic letters enjoys the play and the uniqueness of the letters In this way the Glagolitic script besides everything else becomes the main character of the novel Jasna Horvat was awarded the prize for the highest scientific and artistic achievements of the Republic of Croatia for 2010 by the Croatian Academy of Arts and Sciences in the field of literature exactly for this novel The novel *Az* by Jasna Horvat with Glagolitic alphabet in the core of its thematic structural conceptual and ludic concept is characterized by creative play and creation at all discourse levels An important place in such an approach belongs to numeric symbolism which is used in multiple ways at different textual levels and in all parts of the novel By combining numeric alphabetic and symbolic coding of Glagolitic alphabet with the complex structure of the novel the fragmentary quality of each part but also the mosaic quality within chapters the author is building numeric and symbolic combinations corresponding to the semantic code of the Glagolitic script Numeric and symbolic permutations include the semantic level of each chapter but also the particular recurring motifs into a coded network in which a certain chapter character or situation has a designated place defined by the symbolism of Glagolitic numerology The complex structure of the novel four parts and four narrators and the fifth who is outside the story but the most important one for unveiling the numeric and symbolic potency of the text can be expressed through a mathematical formula $4 \cdot 1$ where number four may be viewed through traditional symbolism of arrangement in the world through Christian symbolism of four Gospels through the concept of a quadrant planning field which according to some hypotheses was used for the construction of Glagolitic characters as well as through the symbolism of a rosette mandala based on the geometry of a square and circle the relationship of quaternity and trinity the human and divine By means of the concept of a game called the Mill which plays an important part in the novel the numeric structure becomes crucial through the model of transforming a trigonal game into a tetragonal through nine intersections and nine mill stones corresponding to nine chapters in the first three parts of the novel with nine ones tenths and hundreds and on the symbolic level to the number of Glagolitic characters expressing the basic message of the Glagolitic script and to the century when it originated Andrijana Kos Lajtman
