Authority, Autonomy, and the Archaeology of a Mississippian Community

Erin S. Nelson, 2024-07-09 This book is the first detailed investigation of the important archaeological site of Parchman Place in the Yazoo Basin a defining area for understanding the Mississippian culture that spanned much of what is now the United States Southeast and Midwest before the mid sixteenth century Refining the widely accepted theory that this society was strongly hierarchical Erin Nelson provides data that suggest communities navigated tensions between authority and autonomy in their placemaking and in their daily lives Drawing on archaeological evidence from foodways monumental and domestic architecture and the organization of communal space at the site Nelson argues that Mississippian people negotiated contradictory ideas about what it meant to belong to a community For example although they clearly had powerful leaders communities built mounds and other structures in ways that re created their views of the cosmos expressing values of wholeness and balance Nelson's findings shed light on the inner workings of Mississippian communities and other hierarchical societies of the period A volume in the Florida Museum of Natural History Ripley P Bullen Series

Presents evidence from across the ages from antiquity through to the Age of Discovery Provides cross cultural comparison of ancient societies around the globe from the Chinese to the Incas and Aztecs from the Greeks and Romans to the peoples of ancient India Explores newly discovered medieval Islamic materials *From the Pleistocene to the Holocene* C. Britt Bousman, Bradley J. Perttula, Chester P. Walker, 2012-06-01 This landmark volume provides the most comprehensive overview to date of the prehistory and archaeology of the Caddo peoples The Caddos lived in the Southeastern Woodlands for more than 900 years beginning around A D 800 900 before being forced to relocate to Oklahoma in 1859 They left behind a spectacular archaeological record including the famous Spiro Mound site in Oklahoma as well as many other mound centers plazas farmsteads villages and cemeteries The Archaeology of the Caddo examines new advances in studying the history of the Caddo peoples including ceramic analysis reconstructions of settlement and regional histories of different Caddo communities Geographic Information Systems and geophysical landscape studies at several spatial scales the cosmological significance of mound and structure placements and better ways to understand mortuary practices Findings from major sites and drainages such as the Crenshaw site mounds in the Arkansas River basin Spiro Mound the Oak Hill Village site the George C Davis site the Willow Chute Bayou Locality the Hughes site Big Cypress Creek basin and the McClelland and Joe Clark sites are also summarized and interpreted This volume reintroduces the Caddos heritage creativity and political and religious complexity *The Native Ground* Kathleen DuVal, 2011-06-03 In *The Native Ground* Kathleen DuVal argues that it was Indians rather than European would be colonizers who were more often able to determine the form and content of the

relations between the two groups Along the banks of the Arkansas and Mississippi rivers far from Paris Madrid and London European colonialism met neither accommodation nor resistance but incorporation Rather than being colonized Indians drew European empires into local patterns of land and resource allocation sustenance goods exchange gender relations diplomacy and warfare Placing Indians at the center of the story DuVal shows both their diversity and our contemporary tendency to exaggerate the influence of Europeans in places far from their centers of power Europeans were often more dependent on Indians than Indians were on them Now the states of Arkansas Oklahoma Kansas and Colorado this native ground was originally populated by indigenous peoples became part of the French and Spanish empires and in 1803 was bought by the United States in the Louisiana Purchase Drawing on archaeology and oral history as well as documents in English French and Spanish DuVal chronicles the successive migrations of Indians and Europeans to the area from precolonial times through the 1820s These myriad native groups Mississippians Quapaws Osages Chickasaws Caddos and Cherokees and the waves of Europeans all competed with one another for control of the region Only in the nineteenth century did outsiders initiate a future in which one people would claim exclusive ownership of the mid continent After the War of 1812 these settlers came in numbers large enough to overwhelm the region s inhabitants and reject the early patterns of cross cultural interdependence As citizens of the United States they persuaded the federal government to muster its resources on behalf of their dreams of landholding and citizenship With keen insight and broad vision Kathleen DuVal retells the story of Indian and European contact in a more complex and ultimately more satisfactory way

Historical Archaeology of Arkansas Carl Drexler, 2024-01-12 Arkansas s diverse geography spanning the Ozark Mountains densely forested Timberlands and Mississippi River Delta and its complex Native American and Euro American history belie the inattentive historical treatment the Natural State has thus far received by scholars Often disparaged as a cultural and intellectual backwater and indeed perhaps best known for President Bill Clinton and Wal Mart this overly simplified image of Arkansas shadows a state rich in historic significance and the archaeological record Carl G Drexler aims to correct this bias in Historical Archaeology of Arkansas In nine essays that range from Civil War sites to the Ozark Mountains to the nineteenth century Jewish community Drexler and his contributors present an Arkansas unknown to all but those dedicated individuals working to publicize the state s hidden diversity The research presented herein depicts a strong state and federal commitment to documenting Arkansas s history perhaps unmatched by any other state in America and the success of public archaeology through the efforts of the Arkansas Archaeological Survey Historical Archaeology of Arkansas not only showcases the natural beauty and rich history of Arkansas but it also serves as a primer for historical inquiry for other state and federal organizations looking to bolster their own programs Carl G Drexler is the Archeological Survey s station archeologist for southwest Arkansas and a research assistant professor with the University of Arkansas His articles have appeared in Archaeology and Historical Memory Historical Archaeology American Antiquity and Field Notes

Fisher, 2017-04-24 As the 20th century began swamps with immense timber resources covered much of the Missouri Bootheel After investors harvested the timber the landscape became overgrown The conversion of swampland to farmland began with small drainage projects but complete reclamation was made possible by a system of ditches dug by the Little River Drainage District the largest in the U S excavating more earth than for the Panama Canal Farming quickly took over The devastation of Southern cotton fields by boll weevils in the early 1920s brought to the cooler Bootheel an influx of black and white sharecroppers and cotton became the principal crop Conflict over New Deal subsidies to increase cotton prices by reducing production led to the 1939 Sharecropper Demonstration foreshadowing civil rights protests three decades later **Plaquemine Archaeology** Mark A. Rees, Patrick C. Livingood, 2007 First major work to deal solely with the Plaquemine societies Plaquemine Louisiana about 10 miles south of Baton Rouge on the banks of the Mississippi River seems an unassuming southern community for which to designate an entire culture Archaeological research conducted in the region between 1938 and 1941 however revealed distinctive cultural materials that provided the basis for distinguishing a unique cultural manifestation in the Lower Mississippi Valley Plaquemine was first cited in the archaeological literature by James

Ford and Gordon Willey in their 1941 synthesis of eastern U S prehistory Lower Valley researchers have subsequently grappled with where to place this culture in the local chronology based on its ceramics earthen mounds and habitations Plaquemine cultural materials share some characteristics with other local cultures but differ significantly from Coles Creek and Mississippian cultures of the Southeast Plaquemine has consequently received the dubious distinction of being defined by the characteristics it lacks rather than by those it possesses The current volume brings together eleven leading scholars devoted to shedding new light on Plaquemine and providing a clearer understanding of its relationship to other Native American cultures The authors provide a thorough yet focused review of previous research recent revelations and directions for future research They present pertinent new data on cultural variability and connections in the Lower Mississippi Valley and interpret the implications for similar cultures and cultural relationships This volume finally places Plaquemine on the map incontrovertibly demonstrating the accomplishments and importance of Plaquemine peoples in the long history of native North America
