Armageddon In The Classroom An Examination Of Nuclear Education:

Armageddon in the Classroom Herbert I. London, 1987-08-19 The classroom texts presently in use on the subject of nuclear weapons provide ample evidence that a biased version of peace studies has insinuated itself into the school curriculum at all levels of study whereby these guides represent a blatant ideological slant in the direction of unilateral disarmament and portray the United States as the culprit in the arms race This book advocates the restoration of a balanced view to the study of national security *Inside American Education* Thomas Sowell, 2010-05-11 An indictment of the American educational system criticizes the fact that the system has discarded the traditional goals of transmitting knowledge and fostering cognitive skills in favor of building self esteem and promoting social harmony **The World & I** , 1987

Intellectuals and Society Thomas Sowell, 2012-03-06 The influence of intellectuals is not only greater than in previous eras but also takes a very different form from that envisioned by those like Machiavelli and others who have wanted to directly influence rulers It has not been by shaping the opinions or directing the actions of the holders of power that modern intellectuals have most influenced the course of events but by shaping public opinion in ways that affect the actions of power holders in democratic societies whether or not those power holders accept the general vision or the particular policies favored by intellectuals Even government leaders with disdain or contempt for intellectuals have had to bend to the climate of opinion shaped by those intellectuals Intellectuals and Society not only examines the track record of intellectuals in the things they have advocated but also analyzes the incentives and constraints under which their views and visions have emerged One of the most surprising aspects of this study is how often intellectuals have been proved not only wrong but grossly and disastrously wrong in their prescriptions for the ills of society and how little their views have changed in response to empirical evidence of the disasters entailed by those views
