**Arms Control and Technological Innovation** David Carlton, Carlo Schaerf, 2024-11-02 First published in 1977 Arms Control and Technological Innovation is primarily concerned with three subjects the causes of the arms race the consequences of the arms race to the world and the control of the arms race Written by experts in the field it brings themes like new technologies and new weapon systems new tactics to replace tactical nuclear weapons in Europe the Anglo American nuclear relationship strategic arms limitation and military strategic concepts and a new approach to strategic arms limitation and reduction The book argues that the principal problem of the arms race according to several lectures is that weapons and delivery systems technology have developed so much as to threaten the survival of civilization itself The pace of technological change is proceeding more rapidly than ever before and there is serious doubt whether political institutions are adapting to this change in time to avoid devastating consequences to the world This book is a must read for scholars and researchers of military and strategic studies international relations international politics and geopolitics

**Arms Control and Technological Change** Christoph Bertram, 1978 Success and Failure in Arms Control Negotiations April Carter, 1989 Governments have been negotiating about disarmament or more limited forms of arms control for forty years Despite these negotiations weapons of increasing deadliness and sophistication continue to be developed Through the use of case studies of particular negotiations Partial and Comprehensive Test Ban SALT I and II INF and START and MBFR CFE the book explores both the reasons for success and the obstacles leading to failure and assesses the importance of different types of explanation Dr Carter not only analyses the reasons why

negotiations fail she also examines the conditions under which they are likely to succeed The result is a balanced comprehensive treatment of the problems and prospects for arms control

**Armament, Arms Control and Artificial Intelligence** Thomas Reinhold,Niklas Schörnig,2022-10-08 Looking at a variety of armament sectors the book examines how Artificial Intelligence AI impacts the fields of armament and arms control how existing arms control measures will be affected by AI and what new approaches based on AI have been or are currently developed The significant increase in computing power the increasing reliance on software and the advent of narrow AI and deep learning algorithms all have the potential to lead to disruptive changes for military operations and warfare rendering many classical arms control instruments less effective or even useless On the other hand AI might lead to completely new arms control approaches raising the effectiveness and reliability of new verification measures To provide a common understanding the book starts by presenting a general introduction to the state of the art in artificial intelligence and arms control and how the two topics are interrelated The second part of the book looks at examples from various fields of weapon technology including weapons of mass destruction WMD conventional armament and emerging technologies The final section offers a cross cutting perspective based on the examples presented in the second part This volume will appeal to students and scholars of international relations as well as policy makers and practitioners interested in a better understanding of peace and security studies in general and armament and arms control in particular with a strong focus on AI

*The Arms Dynamic in World Politics* Barry Buzan,Eric Herring,1998 Presented as a successor to the Cold War era book An Introduction to Strategic Studies this volume explores issues of military security through a framework that links the issues of technology and world politics Arguing that the technological aspect of the global strategic environment is partway through a centuries long process of transformation sped up by the advent of the information age the authors examine such issues as different levels of industrial development on security what they argue is the relative infrequency of the use of force between states the use of military threats such as mass destruction concepts that military means create problems in themselves such as fear of war and insecurity and finally ways in which regulatory schemes such as disarmament can be put to use to solve some of those problems Paper edition unseen 22 50 Annotation copyrighted by Book News Inc Portland OR
