## **Army Forces For Homeland Security:**

*Army Forces for Homeland Security*, 2004 Protecting the American homeland is now a critical priority for the nation and steps are under way to improve the capabilities of civilian organizations throughout the country The role of the U S military and especially the Army is to be prepared to make up for any deficiencies in these capabilities as it has in domestic emergencies throughout our history Since the 2001 terrorist attacks against the World Trade Center and the Pentagon the Army has taken critical steps to improve its capabilities for homeland security HLS The question is whether more should be done to hedge against the risk that these capabilities may not be sufficient given future dangers and risks This report explores ways in which the Army in both its active and reserve components could respond today by conducting more specialized HLS training by improving its responsiveness for domestic emergencies and or by augmenting certain types of its capabilities and then suggests a hedging strategy the Army could adopt This report would be of interest to anyone concerned with how the nation will defend itself against terrorism and the U S Army s role in that defense In the Army this research was sponsored by the Deputy Chief of Staff for Operations and Plans G 3 It was conducted in the RAND Arroyo Center s Strategy Doctrine and Resources Program The Arroyo Center is a federally funded research and development center sponsored by the U S Army

**Responding to catastrophic events : the role of the military and National Guard in disaster response : joint hearing , The Yin-Yang Military** Jacqueline Heeren-Bogers, René Moelker, Esmeralda Kleinreesink, Jan Van der Meulen, Joseph Soeters, Robert Beeres, 2020-09-07 This book examines change processes and the challenge of ambidexterity in military organizations It discusses how military organizations can better adapt to the complex and at times chaotic environments they operate in by developing organizational ambidexterity The authors identify various multiple tasks

and functions of military organizations that require multi dimensional and often contradictory operational technological cultural and social skills In analogy to the often opposed functions performed by the right and left hand of the body modern military organizations are no longer one dimensional fighting machines but characterized by a duality of tasks such as fighting and peacekeeping which often make part and parcel of one and the same mission The military is both a hot and a cold organization a crisis management organization and a bureaucracy As such the book argues that these dualities are not necessarily opposed but can serve as complementary forces like the yin and yang to better the overall performance of these organizations As a consequence ambidextrous organizations excel at complex tasking and are adaptable to new challenges Divided into four parts 1 structures and networks 2 cultural issues 3 tasks and roles 4 nations and allies it appeals to scholars of military studies and organization studies as well as professionals working for governmental or military organizations
