**Arquitectura** Marvin Trachtenberg,Isabelle Hyman,1990-11-23 La arquitectura es a la vez un arte estructural práctico y visual Sin solidez es peligrosa sin utilidad es meramente una escultura a gran escala y sin belleza no es más que una construcción utilitaria Al contemplar la historia de la arquitectura en términos generales como una serie de innovaciones dinámicas los profesores Trachtenberg y Hyman toman en consideración las causas de los cambios producidos en la construcción y el gusto donde se han originado las influencias cuáles han sido sus efectos y cómo los avances tecnológicos el ascensor el hierro el acero y el cristal han moldeado nuestro entorno Empezando la historia con las primitivas estructuras prehistóricas se sigue el hilo de la invención arquitectónica a través de nueve mil años de civilización Un glosario de términos arquitectónicos una extensa bibliografía y un detallado índice onomástico conceptual y temático cierran y completan este libro Las abundantes fotografías de exteriores interiores y detalles y las numerosas plantas y dibujos ayudan eficazmente a la comprensión y disfrute del lector de un tema complejo

**Introducción a la arquitectura. Conceptos fundamentales** Ignasi Solà-Morales Rubio,Jordi Oliveras Samitier,Antoni Ramon Graells,2009-11 Ver la arquitectura entenderla y sentirla no es algo inmediato Requiere un aprendizaje Este libro es ante todo la apertura a un vocabulario a un conjunto de términos a través de los cuales conceptualizamos y hacemos comunicable la experiencia de la arquitectura Si como dijo Wittgenstein el conocimiento empieza en las palabras entonces un libro de iniciación a la arquitectura es un libro que trata de glosar de dotar de contenido ciertas palabras clave con las que como si de una herramienta se tratara hacer posible el montaje y desmontaje de nuestra experiencia de la arquitectura Proponer una introducción a la arquitectura no es tarea sencilla Una introducción destinada a futuros arquitectos pero también a cualquier persona que desee abrir sus ojos y su sensibilidad a uno de los grandes campos de la creación humana de todos los tiempos

## **El pensamiento arquitectónico en España en el siglo XIX a través de las revistas artísticas del reinado isabelino**

ÁLVAREZ RODRÍGUEZ, María

Victoria, 2016-04-18 Dentro del panorama de la historiografía artística española del siglo XIX las revistas artísticas que vieron la luz durante el reinado isabelino constituyen una fuente a la que hasta este momento no se había prestado demasiada atención principalmente porque el carácter divulgativo de muchos de esos artículos los ha hecho parecer a ojos de los especialistas carentes de rigor histórico y por tanto de relevancia en la evolución de la Historia del Arte en nuestro país. Sin embargo el papel que desempeñaron algunas revistas como Semanario Pintoresco Español, El Laberinto Museo de las Familias o El Mundo Pintoresco a la hora de dar a conocer al conjunto de la sociedad las nuevas teorías investigaciones y discursos que se estaban desarrollando por entonces y que por fin conseguían salir del ámbito estrictamente académico para convertirse en los casos más notables en una cuestión de interés nacional merece ser tenido muy en cuenta y valorado como lo que realmente es una herramienta de difusión y concientización de la sociedad isabelina con respecto a su arquitectura y su patrimonio. No todas las publicaciones poseyeron la misma personalidad divulgativa y enciclopédica incorporando artículos sobre Bellas Artes junto a otros tan variopintos como los dedicados a la literatura la historia la ciencia o las costumbres. También hubo algunas que sobre todo en la última década del reinado isabelino abordaron el estudio de la Historia de la Arquitectura desde una óptica más científica y rigurosa en aras del positivismo que estaba arraigando en el país una vez el momento de máximo desarrollo del Romanticismo tocó su fin. Es el caso de artículos como El Arte, El Arte en España o La Revista de Bellas Artes. Paralelamente surgieron otras publicaciones destinadas al colectivo de los artistas y los literatos que se mantuvieron en la estela romántica aspirando a convertirse al igual que sus homónimas francesas en tribunas destinadas a la difusión de los postulados de este movimiento en nuestro país entre ellas destacan El Artista o No Me Olvides. Considerando las diferentes categorías que existen dentro de la evolución de las revistas artísticas entre 1833 y 1868 y las diversas maneras que habían en ellas de abordar la cuestión de la Historia de la Arquitectura la presente tesis constituye un análisis secuenciado y minucioso de la evolución de los artículos referentes a dicho tema que vieron la luz en esas fechas en El Artista, Semanario Pintoresco Español, No Me Olvides, Observatorio Pintoresco, El Siglo XIX, El Laberinto, El Arpa del Creyente, El Reflejo, Museo de las Familias, El Siglo Pintoresco, El Renacimiento, El Mundo Pintoresco, El Arte en España, El Arte y La Revista de Bellas Artes. Consta de una introducción histórica referente a las coordenadas cronológicas y espaciales en que se enmarca la investigación; esto es las pertenecientes al reinado de Isabel II. A continuación se incluye un extenso análisis sobre la situación que se encontraba atravesando por entonces la prensa artística isabelina con referencias a los cambios producidos con respecto a la fernandina las progresivas libertades de prensa alcanzadas la evolución que se puede apreciar en los artículos mencionados la idiosincrasia de cada uno de ellos el posicionamiento trayectoria y producción de sus respectivos directores y sus redactores y el importante papel desempeñado por sus ilustradores y grabadores. Los siete capítulos siguientes se han dedicado a analizar

las opiniones expresadas en esas revistas acerca de los sucesivos estilos arquitectónicos el Antiguo Egipto la Antigüedad clásica la Edad Media el Renacimiento el Barroco el Neoclasicismo y las nuevas corrientes presentes en la arquitectura de la propia época isabelina. En esos capítulos se enumera lo aparecido en la prensa artística acerca de los presupuestos característicos de cada estilo las biografías de los arquitectos considerados más notables por entonces y las descripciones de sus principales monumentos tanto en el extranjero como en España. Finalmente la tesis consta de unas conclusiones una extensa bibliografía dividida en numerosos apartados a fin de facilitar su consulta un apéndice documental en el que aparecen reproducidos íntegramente los artículos más ilustrativos en cada caso y otro apéndice que recoge las abreviaturas relativas a los archivos consultados durante la presente investigación.

**CIUDADES ROMANAS DE LA PROVINCIA BAETICA** CAMPOS CARRASCO, JUAN M., BERMEJO MELÉNDEZ, JAVIER, 2018-12-20 El proyecto Ciudades Romanas de la Bética CORPVS VRBIVM BAETICARVM I que se plantea con vocación de continuidad hasta completar toda la geografía de la Bética ha tenido como objetivo fundamental la recopilación de la información arqueológica más reciente y actualizada referida a todas las ciudades de los conventus hispalensis y astigitanus así como el establecimiento de los límites de los mismos. A las sántesis temáticas elaboradas por diferentes especialistas se añade la scheda de todas las ciudades de los dos conventus conteniendo una información jerarquizada y ordenada según grandes líneas temáticas urbanística arquitectura mundo funerario escultura epigráfica diagnóstico y conservación del sitio etc con toda la bibliografía de referencia o específica de cada una de las entidades urbanas. Para acceder al contenido total de esta información se ha diseñado como complemento de esta monografía una herramienta consistente en un entorno web amigable de acceso de consulta abierto con motores de búsqueda y una cartografía georeferenciada actualizada con los límites y posiciones de yacimientos. Esto supone un aspecto de enorme potencial y con un perfil novedoso posicionar el conocimiento que sobre el urbanismo bético se tiene en un entorno web con el añadido del desarrollo de un conjunto de herramientas de consulta y gestión.

wide range of divinities through the medium of priests and worshippers Discussion focuses on the analysis or reconstruction of the centres at which devotees gathered and draws on the full range of available evidence While literary authorities remain of primary concern these are for the most part overshadowed by other categories of evidence in particular archaeology epigraphy numismatics and iconography sources in some cases confirmed by the latest geophysical techniques electrical resistivity tomography or ground probing radar The material is conveniently presented by geographical area using modern rather than Latin terminology Rome Italy Britain Gaul Spain Hungary along with a broader section that covers the empire in general The titles of the various articles speak for themselves but readers may find the preface of interest in so far as it sets out my ideas on the use of ancient evidence and the pitfalls of some of the approaches favoured by modern scholars Together with the wide range of individual papers the preface makes the book of interest to all students of the Roman empire as well as those specifically concerned with the history of religions
