Arrow Talk Andrew Strathern, Pamela J. Stewart, 2000 In a postmodern era in which culture has been dismissed by many anthropologists as a reification this study argues for cultural holism by showing how symbolic psychological religious and linguistic factors have shaped Melpa responses to political and economic crises *Ku Waru* Francesca Merlan, Alan Rumsey, 1991-03-29 The highlanders of New Guinea are renowned for their elaborate systems of ceremonial exchange Although much has been written about them previous accounts have concentrated far less on the conduct of exchange events than on the structure of exchange systems This 1991 book deals centrally with the conduct of particular exchange events and shows through examination of them how larger social structures are reproduced and transformed As part of the emphasis on exchange as social action the book closely examines the oratory that plays a crucial part in the events Basing their study on original fieldwork carried out in the Nebilyer Valley Francesca Merlan and Alan Rumsey focus on an inter related set of large scale compensation payments which arose out of an episode of warfare This book furthers our understanding of the interaction between social structures and historical events and particularly of the crucial role of talk It will be of special interest to anthropologists and linguists

A Grammar of Kwaza Hein van der Voort, 2008-08-22 This work contains a comprehensive description of Kwaza which is an endangered and unclassified indigenous language of Southern Rond nia Brazil The Kwaza language also known in the literature as Koai is spoken by around 25 people today Until recently our knowledge of Kwaza was based on only three short word lists from 1938 1943 and 1984 Like the language the culture and the history of its speakers are undocumented The Kwaza people as an ethnic group have been decimated by increasing ecological physical social and cultural pressure from Western civilisation since contact in the past century This is the situation for many indigenous peoples of Rond nia and of the Amazon region in general Linguists expect that the majority of these peoples will cease to exist as distinct language communities during the coming decades The present work is intended as a contribution to the documentation and preservation of the languages of the Amazon basin In this respect Kwaza has represents an especially urgent case in view of its undetermined classification

the lack of documentation and its endangered status This work is based on the author s personal fieldwork conducted between 1995 and 2002 and it consists of three parts Part I contains a thorough description of the phonology and morphosyntax of the language and a concise overview of its social cultural and historical context Part II contains a diverse selection of transcribed and translated texts with interlinear morphological analyses Part III is a dictionary of Kwaza including many examples and an English Kwaza register This complete description is of interest to linguists in general scholars of South American languages in particular and anthropologists and historians interested in the Guapor region

Order Without Rules David Bogen,1999-04-29 Order Without Rules establishes the basic terms for a critical discourse between the theory of communicative action and the tradition of practice based inquiries inspired by Wittgenstein and elaborated within the field of ethnomethodology It argues that such a discourse not only is possible but that it is essential if critical theory is to move beyond the crisis caused by the decline of the great rationalist social projects of the past two centuries and the simultaneous rise of an array of post enlightenment and anti rationalist movements waiting to take their place Since Max Weber social theory has been faced with a paradox the problem of rationality that seems to challenge the very foundations of critical and humanist visions of modern society According to Weber as industrial societies develop they increasingly are dominated by rational procedures for the production of goods the organization of human resources and the management of information The paradox consists in the fact that while modern society is in this instrumental sense becoming more rationalized the prospects for developing political and cultural institutions which are linked to a progressive vision of rational discourse and democratic will formation are diminished Order Without Rules addresses the problem of rationality in its most contemporary incarnation the critical theory of the German philosopher and social critic J rgen Habermas Habermas attempts to resolve the Weberian paradox by identifying the rational core of communication with universal processes of interpretive understanding that are present in everyday conversation Drawing upon the work within the Wittgensteinian and ethnomethodological traditions of linguistic and social analysis this book questions whether the logic of language underlying Habermas s theory of communicative action is in fact the defining feature of conversational practice It is argued that Habermas s conception of linguistic rules and their connection to rational action is ill founded and that a fundamental rethinking of his concept of communicative action is therefore required Throughout the book a reflexive orientation is maintained toward questions of method and the internal relationship between disciplinary practices and empirical phenomena

Love Cycles, Fear Cycles David Woodsfellow, Deborah Woodsfellow, 2018-03-27 Love Cycles Fear Cycles teaches readers the most important idea in all of couples therapy This idea gives readers a new understanding of what's been going wrong in their marriage and a new way to make things right The key idea is changing a couple's negative cycle back into their positive cycle Most relationships start in a positive cycle where both people feel wonderful and respond lovingly There are four words that describe each couple's positive cycle one for each person's good feeling and one for each person's loving response However as challenges arise people instinctively respond with some type of fight or flight Over time these responses spiral together into a negative cycle where each person feels bad and responds defensively There are four words for each couple's negative cycle one for each person's worst feeling and one for each person's defensive reaction Many couples get trapped in their negative cycle and their relationship spirals deeper into hurt and loneliness To have a good marriage a couple needs to find a way out of their negative cycle and back into their positive cycle Love Cycles Fear Cycles teaches readers how to do that From his decades as a couples therapist Dr Woodsfellow has distilled this one most essential component of all successful marriage counseling He now presents this to the general public in a way that is easy to understand and easy to use
