**Art and the Question of Meaning** Hans Küng, 1981 Many people find modern art in whatever medium meaningless Its radical questioning of all aesthetic norms its wild experimentation and its lack of direction stand in stark contrast to the past with its great tradition of meaningful artistic expression Of course it can be argued that modern artists are simply feeling much more deeply what anyone alive today must sense however vaguely and superficially a deeply pessimistic and often nihilistic mood And if art is to have integrity artists cannot escape that However anyone who believes in a first and last ground of meaning of the world and man even at a time of the disintegration of traditions can scarcely believe in a definitive chaos of art if art is a genuine representation of the realities of our time it should be possible by understanding it more deeply to find greater meaning the other side of seeming meaninglessness This briefly stated is the argument of Hans Kueng s latest study both profound and provocative which introduces a new and important dimension to his thought **Res:**

[Presentation of Philosophy and Its History](#) Ulrich Steinvorth, 2024-11-28 This book presents philosophy as a historical series of answers to two questions the meaning question what does it all mean and the reality question what is real rather than illusory Presenting philosophy as a historical series of answers to these two questions gives a new view of philosophy It reveals a coherence between the disparate problems of philosophy which is not apparent when philosophy is approached in a systematic and timeless manner On the basis of this historical approach the book argues that philosophy was initially concerned primarily with the nature of reality but changed its focus when science was established as a separate discipline in the 17th century Philosophy s main concern is now the meaning question with a focus on questions of value as discussed in moral and political philosophy and in aesthetics This book is essential reading for all scholars and researchers in philosophy and especially those interested in the history of philosophy [Big Data: Concepts, Methodologies, Tools, and Applications](#)

embeddedness tracks through several overarching and interlocking concerns the relationship between form and content in both art and theology the intensification of the metaphysical and the theological contra materialist and positivist reductionisms the expansion of the epistemological possibilities of the theology art conversation and a robust understanding of the world as the theatre of God's glory Several chapters have been co written by theologians and artists as part of demonstrating the kind of conversation that this book commends A thorough going commitment to Scripture is also woven into the many different habits of thought represented in this volume Part I surveys different approaches to the theology arts conversation Part II focuses on how particular art forms bring theological issues to the surface and how theological and denominational traditions shape the making and receiving of the arts Part III delves into key topics in the current theology arts scene and asks how artistic and theological performance can both speak to theological and artistic knowing and help to celebrate and interrogate embodied lived reality *Integrating the Visual Arts Across the Curriculum* Julia
