New Insights in the Health Benefits of Art Olivier Beauchet,Auriane Gros,Andy Hau Yan Ho ,Ian Koebner,2024-06-11 In 2019 the World Health Organization demonstrated with a scoping review that art based activities regardless of their characteristics have promising health benefits More specifically practicing art based activities was demonstrated to contribute to core determinants of health to

play a key role in health promotion and prevention especially with regard to the onset of mental illness and age related physical decline and to assist in acute and end of life care This report also underscored first a lack of robust data on art's health benefits meaning data obtained with gold standard experimental study designs i.e. randomized control trials and second that certain topics e.g. social health and populations e.g. older community dwellers have been underexamined In addition little is known about both the mechanisms of art's health benefits and how to implement an art based activity for health purposes in practice

Art Practice as Research Graeme Sullivan, 2010 Art Practice as Research Second Edition continues to present a compelling argument that the creative and cultural inquiry undertaken by artists is a form of research The text explores themes practices and contexts of artistic inquiry and positions them within the discourse of research Sullivan argues that legitimate research goals can be achieved by choosing different methods than those offered by the social sciences The common denominator in both approaches is the attention given to rigor and systematic inquiry Artists emphasize the role of the imaginative intellect in creating criticizing and constructing knowledge that is not only new but also has the capacity to transform human understanding

Aleksandr Konstantinovich Voronskii's Literary Criticism Frederick Schuyler Choate, 1987 *Richard Wagner* Houston Stewart Chamberlain, 1897 *Bodies of Stone in the Media, Visual Culture and the Arts* Alessandra Violi, Barbara Grespi, Andrea Pinotti, Pietro Conte, 2025-10-01 If mediatization has surprisingly revealed the secret life of inert matter and the face of things the flipside of this has been the petrification of living organisms an invasion of stone bodies in a state of suspended animation Within a contemporary imaginary pervaded by new forms of animism the paradigm of death looms large in many areas of artistic experimentation pushing the modern body towards mineral modes of being which revive ancient myths of flesh made stone and the issue of the monument Scholars in media visual culture and the arts propose studies of bodies of stone from actors simulating statues to the transmutation of the filmic body into a fossil from the real treatment of the cadaver as a mineral living object to the rediscovery of materials such as wax from the quest for a thermal equivalence between stone and flesh to the transformation of the biomedical body into a living monument

The Proletarian Episode in Russian Literature, 1928-1932 Edward James Brown, 1971

Theatre/Ecology/Cognition T. Paavolainen, 2015-12-11 How is performer object interaction enacted and perceived in the theatre How thereby are varieties of meaning also enacted and perceived Using cognitive theory and ecological ontology Paavolainen investigates how the interplay of actors and objects affords a degree of enjoyment and understanding whether or not the viewer speaks the language

Emotion and Cognitive Life in Medieval and Early Modern Philosophy Martin Pickavé, Lisa Shapiro, 2012-10-04 This volume explores emotion in medieval and early modern thought and opens a contemporary debate on the way emotions figure in our cognitive lives Thirteen original essays explore the key themes of emotion within the mind the intentionality of emotions emotions and action and the role of emotion in self understanding and social situations

What is the Meaning of Human Life? Raymond A. Belliotti, 2001 This book examines core concerns of

human life What is the relationship between a meaningful life and theism Why are some human beings radically adrift without radical foundations and struggling with hopelessness Is the cosmos meaningless Is human life akin to the ancient Myth of Sisyphus What is the role of struggle and suffering in creating meaning How do we discover or create value Is happiness overrated as a goal of life How if at all can we learn to die meaningfully *Life without a Ground: A Praxis of Being-in-the-World* Daniil Koloskov, 2024-07-18 This book argues for the pragmatist thesis of the primacy of praxis on a phenomenological basis Demonstrating the relevance of phenomenology it provides a systematic overview of the contemporary pragmatic landscape taking into account not only a family of neo pragmatic approaches but also the current pragmatic readings of phenomenology This volume offers an innovative formulation of the primacy of practice thesis based on the genetic reformulation of Heidegger's notions of disclosure Dasein and average intelligibility Das Man Investigating the dynamic interrelation among those notions the author arrives at the phenomenological conception of forms of life or average background practices and argues that a form of life is not a pragmatic condition of meaningfulness but an outcome of the dynamic process of meaning formation This text concludes that the formation of meaning has no overarching origin but sources from the bundle of disparate practical spaces and is anarchic in nature It appeals to students and researchers working in phenomenology and philosophical anthropology

Glossary of Cognitive Action (For a Not-So-Distant Future) Warren Neidich, 2024-02-27 We are at one of those turning points that divide history into a before and an after The ongoing transition from an information economy to an economy based in the workings of the brain and the mind has radical implications for human freedom and creativity both of which are under threat from a rapacious form of technological capitalism Such moments require new languages in order for the unnamed the unsayable and the misunderstood to become known This is the task taken on by Warren Neidich's Glossary of Cognitive Activism now appearing in an expanded and fully revised fourth edition Each of its entries which range in topic from the central nervous system and brain computer interfaces to ChatGPT and conceptual art explicates a key term in contemporary culture The cumulative effect is astonishing while every entry can profitably be read in isolation the Glossary as a whole amounts to a brilliant account of the material brain's entanglement with its surrounding environment For Neidich the human brain is far more than grey matter encased in a skull it is profoundly integrated with the social political and cultural phenomena that constitute the world in which we live For this reason human cognition is profoundly vulnerable to the new despotism that is seeking in various ways to reshape it but it also has the capacity to serve as the site of potent acts of resistance Forging connections between such apparently disparate domains as neuroscience ecology political economy and aesthetics Neidich's Glossary restores human cognition to its rightful status not as the passive object of technological interventions or reductive theorizing but as the starting point for any viable form of egalitarian and liberatory politics

Cognitive Sciences and Medieval Studies Juliana Dresvina, Victoria Blud, 2020-11-01 This study brings together medieval studies and cognitive methodologies in a study specifically aimed at

medievalists It presents a longer history of certain mental health conditions and locates contemporary debates about the mind in a broader historical framework It considers both the benefits of incorporating insights from contemporary neuroscientific and cognitive studies into the exploration of the past and the benefits of employing historical models and case studies in order to reflect on modern methods *The American Slavic and East European Review* ,1949 *Cognitive Science* Ramesh Kumar Mishra,2022-12-05 This volume provides an overview of cognitive science and critically assess areas within the topic that are evolving rapidly It discusses the effects of religious and meditative practices on its core components Using multidisciplinary studies and rich empirical literature discussions and demonstrations this volume Discusses the evolution of cognition with reference to material records and the use of brain imaging Highlights emerging domains and novel themes within cognitive science such as transgender cognition space cognition cross cultural cognition futuristic artificial intelligence social cognition and moral cognition Reflects on the status of cognition research in these emerging areas and critically evaluates their current progress Explores data both from behavioural and neuroimaging research literature and sheds light on the potential effects of technological growth and changing habits on attention and cognitive abilities of humans Speculates research domains that would gain importance in the next few decades in cognitive science research A comprehensive study finding commonalities in theoretical frameworks and models in emerging areas in cognition research this book will be of interest to students researchers and teachers of cognitive psychology cognitive science neurosciences medical sciences and computer sciences It will also be helpful for academicians psychologists neuroscientists mental health professionals medical professionals counsellors and those looking for an alternate perspective on the topic

The New Lives of Images Adrian J. Ivakhiv,2025-09-30 In this ambitious new work eco philosopher and cultural theorist Adrian Ivakhiv presents an incisive new way of thinking about images and imagination Drawing upon an immense range of materials Ivakhiv reassesses the place of imagination in cultural life analyzing how people have interacted with images in the past and the ways that digital media are profoundly altering these relationships today The book contributes powerfully to the study of visual culture and digital media and provides provocative interpretations of a range of important artists and media movements from the work of photographer Edward Burtynsky the ambitious multi screen installations of John Akomfrah the abstract art of Swedish spiritualist Hilma af Klint and the Afrofuturism of jazz musicians like Sun Ra and poet Alexis Pauline Gumbs to the ever expanding universe of animal videos on YouTube Along the way the book delves into animacy and religious imagery iconophilia and iconoclasm divination and prophecy truthiness and enchantment networks online communities and artificial intelligence the political and affective economies of digital media and the role of utopian futurism in the present climate colonial Anthropocene predicament The result is a vital contribution toward a more empowering conception of the creative imagination and its possibilities in today s emerging digital ecology
