Hubbard, 1981 *Index to Media and Materials for the Mentally Retarded, Specific Learning Disabled, Emotionally Disturbed* National Information Center for Special Education Materials, 1978 *Handbook of Research on Contemporary Storytelling Methods Across New Media and Disciplines* Mih?e?, Lorena Clara, Andreescu, Raluca, Dimitriu, Anda, 2021-01-15 Stories are everywhere around us from the ads on TV or music video clips to the more sophisticated stories told by books or

movies Everything comes wrapped in a story and the means employed to weave the narrative thread are just as important as the story itself In this context there is a need to understand the role storytelling plays in contemporary society which has changed drastically in recent decades Modern global society is no longer exclusively dominated by the time tested narrative media such as literature or films because new media such as videogames or social platforms have changed the way we understand create and replicate stories The Handbook of Research on Contemporary Storytelling Methods Across New Media and Disciplines is a comprehensive reference book that provides the relevant theoretical framework that concerns storytelling in modern society as well as the newest and most varied analyses and case studies in the field The chapters of this extensive volume follow the construction and interpretation of stories across a plethora of contemporary media and disciplines By bringing together radical forms of storytelling in traditional disciplines and methods of telling stories across newer media this book intersects themes that include interactive storytelling and narrative theory across advertisements social media and knowledge sharing platforms among others It is targeted towards professionals researchers and students working or studying in the fields of narratology literature media studies marketing and communication anthropology religion or film studies Moreover for interested executives and entrepreneurs or prospective influencers the chapters dedicated to marketing and social media may also provide insights into both the theoretical and the practical aspects of harnessing the power of storytelling in order to create a cohesive and impactful online image **Art** Beckley-Cardy Company, Chicago. Benefic Press, Guy Hubbard, Mary J. Rouse, 1981 **Meaning and Method** Isaac Reed, Jeffrey C. Alexander, 2015-11-17 Culture is increasingly important to American social science but in what way This book addresses the core issues of the sociology of culture questions about the social role of meaning along with those about the methods sociologists use to study culture and society in a manner that makes clear their relevance to sociology as a whole Part I consists of essays by leading cultural sociologists on how the turn to culture has changed the sociological study of organizations economic action and television and concludes with Georgina Born s methodological statement on the sociology of art and cultural production Part II contains a highly original and at times heated debate between Richard Biernacki and John H Evans on the appropriateness of abstract and quantifiable coding schemes for the sociological study of culture Ranging from the philosophy of science to the concrete practical problems of interpreting masses of cultural data the debate raises the controversy over the interpretation of culture and the explanation of social action to a new level of sophistication *The impact of art therapy on mental health and well-being* Helena José, Joao Apostolo, Luciano Vitorino, Luis Manuel Mota de Sousa, Martina Giusti, 2023-12-22 In 2019 the WHO came out with a scoping review related to the evidence on the role of the arts in improving health and well being In the last yeast in fact literature has recognized the direct and indirect benefits of art in the prevention and promotion of mental and physical health and in the management and treatment of disease Although some countries have made progress in developing policies that make use of the arts to support health and well being many have

not yet addressed the opportunities that exist for using the arts to support health and for others policy activities have been time limited Nonetheless the relationship between art and health has existed since the birth of medicine itself and has strongly influenced its history and its evolution Art therapy is the main expression of art in health care The integration of art in traditional health assistance paths sustains the need to have a holistic approach to health wellness and well being both of patients and other stakeholders including caregivers and healthcare professionals Currently the main area of art therapy application is mental health with especially regards to disability both in developmental age and in elderly and both to cognitive and physical impairment and dementia However it is important to remark that mental health does not only refer to mental illness but also to people s emotional psychological and social well being These last cases have particularly worsened with the long lockdown periods due to the COVID 19 pandemic

Hubbard,1981 Why Art Cannot Be Taught James Elkins,2001-05-17 He also addresses the phenomenon of art critiques as a microcosm for teaching art as a whole and dissects real life critiques highlighting presuppositions and dynamics that make them confusing and suggesting ways to make them more helpful Elkins s no nonsense approach clears away the assumptions about art instruction that are not borne out by classroom practice For example he notes that despite much talk about instilling visual acuity and teaching technique in practice neither teachers nor students behave as if those were their principal goals He addresses the absurdity of pretending that sexual issues are absent from life drawing classes and questions the practice of holding up great masters and masterpieces as models for students capable of producing only mediocre art He also discusses types of art including art that takes time to complete and art that isn t serious that cannot be learned in studio art classes

How Secular Is Art? Tapati Guha-Thakurta,Vazira Zamindar,2024-05-31 As an invitation to interrogate the secular modality of art the book unsettles both the categories of art and secular in their theoretical and historical implications It questions the temporal spatial and cultural binaries between the sacred and the secular that have shaped art historical scholarship as well as artistic practice Thinking from the south all the essays here are anchored in a conception of a region one fissured by histories of partition state formations and religious nationalisms but still offering a collective site from which to speak to the disciplines of art and the knowledge worlds in which they are embedded The book asks How do we complicate the religious designations of pre modern art and architecture and the new forms of their resurgence in contemporary iconographies and monuments How do we re conceptualize the public and the political as fiery contestations and new curatorial practices reconfigure the meaning of art in the proliferating spaces of museums galleries biennales and festivals How do we understand South Asian art s deep entanglements with the politics of the present
