Art and society (Las ideas estéticas de Marx, engl.) Essays in Marxist aesthetics by Adolfo Sánchez Vázquez Adolfo Sánchez Vázquez, 1973 *Art and Postcapitalism* Dave Beech, 2019-10-20 Artistic labour was exemplary for Utopian Socialist theories of attractive labour and Marxist theories of nonalienated labour but the rise of the anti work movement and current theories of fully automated luxury communism have seen art topple from its privileged place within the left's political imaginary as the artist has been reconceived as a prototype of the precarious 24/7 worker Art and Postcapitalism argues that art remains essential for thinking about the intersection of labour capitalism and postcapitalism not insofar as it merges work and pleasure but as an example of noncapitalist production Reassessing the contemporary politics of work by revisiting debates about art technology and in the nineteenth and twentieth century Dave Beech challenges the aesthetics of labour in John Ruskin William Morris and Oscar Wilde with a value theory of the supersession of capitalism that sheds light on the anti work theory by Silvia Federici Andre Gorz Kathi Weeks and Maurizio Lazzarato as well as the technological Cockayne of Srnicek and Williams and Paul Mason Formulating a critique of contemporary postcapitalism and developing a new understanding of art and labour within the political project of the supersession of value production this book is essential for activists scholars and anyone interested in the real and imagined escape routes from capitalism **A Companion to Latin American Philosophy** Susana Nuccetelli, Ofelia Schutte, Otávio Bueno, 2013-03-05 This comprehensive collection of original essays written by an international group of scholars addresses the central themes in Latin American philosophy Represents the most comprehensive survey of historical and contemporary Latin American philosophy available today Comprises a specially commissioned collection of essays many of them written by Latin American authors Examines the history of Latin American philosophy and its current issues traces the development of the discipline and offers biographical sketches of key Latin American thinkers Showcases the diversity of approaches issues and styles that characterize the field **The Routledge Companion to Marxisms in Art History** Tijen Tunalı, Brian Winkenweder, 2025-03-31 This companion is an essential contribution to the study of historical materialism in general and the social history of art in particular Each chapter in the collection focuses on a key figure concept or historical epoch Increasingly scholars adopt an array of Marxist methods intertwined with a host of other theoretical practices particularly the historiography of key issues regarding hegemony ideology and identity Ideological issues of connoisseurship patronage and analyses of the artwork as a form of labor and

leisure are essential to the practice of Marxisms in art history This collection spotlights a plurality of Marxian theories in which the ideas of such figures as Walter Benjamin Guy Debord and T J Clark are debated and developed through analyses of the socio historical conditions that impact how art is produced circulated and received This ultimately underscores that the historical contextualization of artworks and their markets within a class based society is crucial for writing socially engaged art history This book will be of interest to scholars working in art history visual studies visual sociology communication studies and the sociology of art

Reclaiming William Morris Michelle Weinroth,1996 A study providing a theoretical historical and exegetical analysis of the impassioned yet decidedly marginal propagandist texts of early 20th century English communists Weinroth argues that the communists struggled to retain Morris s Englishness while promoting his political doctrine thereby placing themselves in a paradoxical situation they could not grip the masses without the aesthetic appeal of Englishness but Englishness was imbued with the very imperialism they abhorred Annotation copyright by Book News Inc Portland OR

Graeme Chalmers,1996-01-01 Educational trends will change and research agendas will shift but art teachers in public institutions will still need to educate all students for multicultural purposes argues Chalmers in this fifth volume in the Occasional Papers series Chalmers describes how art education programs promote cross cultural understanding recognize racial and cultural diversity enhance self esteem in students cultural heritage and address issues of ethnocentrism stereotyping discrimination and racism After providing the context for multicultural art education Chalmers examines the implications for art education of the broad themes found in art across cultures Using discipline based art education as a framework he suggests ways to design and implement a curriculum for multicultural art education that will help students find a place for art in their lives Art educators will find Celebrating Pluralism invaluable in negotiating the approach to multicultural art education that makes the most sense to their students and their communities

Nietzsche's Political Economy Dmitri G. Safronov,2023-08-21 Safronov s Nietzsche s Political Economy is a pioneering appraisal of Nietzsche s critique of industrial culture and its unfolding crisis The author contends

that Nietzsche remains unique in conceptualizing the upheavals of modern political economy in terms of the crisis of its governing values Nietzsche scrutinises the norms which not only preside over the unfathomable build up in debt the proliferation of meaningless impersonal slavery and the rise of increasingly repressive social control systems but inevitably set these precarious tendencies of modern political economy on a collision course liable to culminate in an unprecedented human and environmental catastrophe Safronov explores the core themes of Nietzsche's political economy debt slavery and the division of labour with reference to the influential views of Adam Smith and Karl Marx as well as against the backdrop of the Long Depression 1873-1896 the first truly international crisis of industrial capitalism during which most of Nietzsche's work was completed In Nietzsche's assessment modern political economy is predicated on the valuations that diminish humankind's prospects and harm the planet's future by consistently enfeebling the present as long as there is profit to be made from it Nietzsche's critical insight which challenges the most fundamental tenet of modern economics and finance is that in order to build a stronger and intrinsically more valuable future in lieu of simply speculating on it as though the liberal Promised Land could descend upon us like the manna from heaven at the wave of an invisible hand of the market it is necessary to walk from the future we dare to envisage resolutely back to the present we inhabit to determine what demands achieving such a vision would impose upon us instead of embellishing the here and now by cynically discounting the future to the net value of the present while disparaging disowning and rewriting the past to unburden ourselves of its troubling legacy as we continue to frivolously squander its capital to the alluring tunes of the sirens who in the marketplace sing to us of the future The enabling mechanism for changing our valuing perspectives Nietzsche tells us lies dormant in us and it must be unlocked before it is too late

The Concrete Body Elise Archias, 2016-11-29 Offering an incisive rejoinder to traditional histories of modernism and postmodernism this original book examines the 1960s performance work of three New York artists who adapted modernist approaches to form for the medium of the human body Finding parallels between the tactility of a drip of paint and a body's reflexive movements Elise Archias argues convincingly that Yvonne Rainer b 1934 Carolee Schneemann b 1939 and Vito Acconci b 1940 forged a dialogue between modernist aesthetics and their own artistic community's embrace of all things ordinary through work that explored the abstraction born of the body's materiality Rainer's task-like dances Schneemann's sensuous appropriations of popular entertainment and Acconci's behaviorist inflected tests highlight the body's unintended movements as vital reminders of embodied struggle amid the constraining structures in contemporary culture Archias also draws compelling comparisons between embodiment as performed in the work of these three artists and in the sit-ins and other nonviolent protests of the era
