Coupling Symbolic and Numerical Computing in Expert Systems, II Janusz S. Kowalik, Charles T. Kitzmiller, 1988
Mathematics of Computing Numerical Analysis *Coupling Symbolic and Numerical Computing in Expert Systems, II*
Janusz S. Kowalik, Charles T. Kitzmiller, 1988 Mathematics of Computing Numerical Analysis *Coupling Symbolic and Numerical Computing in Expert Systems ; 2*, 1987 **Coupling Symbolic and Numerical Computing in Expert Systems**, 1986 **Methods and Tools for Applied Artificial Intelligence** Popovic, 1994-05-02 This work provides a comprehensive and coherent introduction to the expanding field of Artificial Intelligence AI explaining how knowledge based systems are built what tools and technologies are relevant and available and how to employ them in specific situations It pays special attention to the commercial intelligence systems that emerged in the 80s as well as projecting the likely developments of the 90s **Computerized Symbolic Manipulation in Mechanics** Edwin Kreuzer, 2014-05-04 The aim of this book is to present important software tools basic concepts methods and highly sophisticated applications of computerized symbolic manipulation to mechanics problems An overview about general purpose symbolic software is followed by general guidelines how to develop and implement high quality computer algebra code The theoretical background including modeling techniques for mechanical systems is provided which allows for the computer aided generation of the symbolic equation of motion for multibody systems It is shown how the governing equations for different types of problems in structural mechanics can be automatically derived and how to implement finite element techniques via computer algebra software Perturbation methods as a very powerful approach for nonlinear problems are discussed in detail and are demonstrated for a number of applications The applications covered in this book represent some of the most advanced topics in the rapidly growing field of research on symbolic computation *Development of Knowledge-Based Systems for Engineering* Carlo Tasso, Edoardo R. de Arantes e Oliveira, 2014-05-04 The goal of the volume is twofold to help engineers to understand the design and development process and the specific techniques utilized for constructing expert systems in engineering and secondly to introduce computer specialists to significant applications of knowledge based techniques in engineering Among the authors are world famous experts of engineering and knowledge based systems development Expert systems for technical fault diagnosis Roman R. Laczkovich, 1990-01-01 First published in 1990 and now available unchanged in English this book offers a rare in depth look at diagnostic expert systems DXPS at the moment they moved from laboratory prototypes into real world use Written for both scientists and practitioners it bridges computer science engineering and business management The author examines the challenges of creating and integrating DXPS beyond pure IT questions sourcing or building knowledge bases embedding systems into operational environments adapting maintenance strategies and addressing legal data protection and security concerns The work demystifies expert systems by clearly defining their actual capabilities and limits Three categories of diagnostic problems are identified and tailored DXPS types are designed for

each The result is a practical and conceptual framework that remains relevant today especially for those exploring hybrid AI approaches that combine modern machine learning with transparent rule based reasoning This edition preserves the original text while contextualizing it in a new foreword that links early expert system concepts to the AI architectures of the 21st century

Computer Aided Systems Theory - EUROCAST '91 Franz Pichler,Roberto Moreno Diaz,1992-04-08 This volume contains a selection of papers presented at the second European workshop EUROCAST 91 held in Krems Austria in April 1991 It gives an overview of the current state of Computer Aided Systems Theory research and its relation to CAD applications in the engineering fields CAST research requires the application of the most advanced information processing technology in software and hardware for the implementation of CAST method base systems Engineers in the field of information and control engineering have the opportunity in CAST to present the state ofthe art in modeling tools to computer scientists EUROCAST 91 proved that CAST research is still in an early state of development The papers in the volume are organized into sections on systems theory and CAST methodology modeling environments CAST method base systems and artificial vision and information and control systems

Parallel Computing D.J Evans,C.N Sutti,2020-11-25

Parallel Computing Methods Algorithms and Applications presents a collection of original papers presented at the international meeting on parallel processing methods algorithms and applications at Verona Italy in September 1989

Artificial Intelligence with Common Lisp James L. Noyes,1992 The book provides a balanced survey of the fundamentals of artificial intelligence emphasizing the relationship between symbolic and numeric processing The text is structured around an innovative interactive combination of LISP programming and AI it uses the constructs of the programming language to help readers understand the array of artificial intelligence concepts presented After an overview of the field of artificial intelligence the text presents the fundamentals of LISP explaining the language s features in more detail than any other AI text Common Lisp is then used consistently in both programming exercises and plentiful examples of actual AI code Back cover This text is intended to provide an introduction to both AI and LISp for those having a background in computer science and mathematics Pref

Integrated Distributed Intelligent Systems in Manufacturing M. Rao,Qun Wang,Jianzhong Cha,1993-07-31 Intelligent Manufacturing is a new disciplinary field which applies computer science artificial intelligence mechanical engineering and systems science to industrial manufacturing processes This book presents a new integration architecture for implementing real time distributed intelligent manufacturing systems

Computer Aided Systems Theory - EUROCAST '93 Franz Pichler,Roberto Moreno Diaz,1994-01-28 This volume contains a selection of papers presented at the third European Computer Aided Systems Theory workshop EUROCAST 93 held in Spain in February 1993 The workshop emphasizes interdisciplinarity with the specificgoal of creating a synergy between fields such as systems theory computer science systems engineering and related areas The contributions in this volume are strongly related to current problems in CAST research They emphasize an engineering point of view concerning systems theory Since the

computer is an essential instrument in CAST research there are close relations to specific topics in computer science The papers are grouped into parts on systems theory and systems technology specific methods and applications *Expert Systems for Scanner Data Environments* John M. McCann, John P. Gallagher, 2012-12-06 This book is about the role of expert systems in marketing particularly in the consumer goods industry Section I describes the changing nature of consumer marketing and presents the rationale and need for expert systems The remainder of the book combines a tutorial on expert systems with a series of expert system prototypes The tutorial material is presented in three places First section II is devoted to introducing expert systems in general Chapter 3 provides a general introduction to the topic which is continued in chapter 4 where a small expert system the Promotion Advisor is used to illustrate the important features of a backward chaining rule based system The promotion theme is extended in chapter 5 where a larger system is presented The material in all three of these chapters was designed as an introduction and tutorial on the most common technology for building applied expert systems the backward chaining rule based inference engine Tutorial material is also contained in the body of the chapters that describe the prototypes This material is usually in the form of sample rules and a description of the process for applying the rules The third location of the expert system material is in chapters that follow discussions of the prototypes Chapter 7 is a technical chapter on the coupling of expert systems to traditional systems **Integrated Distributed Intelligent**
