

# CourseCARD

## Introduction

This course is designed to provide students with a comprehensive understanding of the principles and practices of project management. The course covers the entire project lifecycle, from initiation to closure, and includes practical applications and case studies.

## Course Objectives

By the end of this course, students will be able to:

- Identify the key components of a project and the roles of the project manager.
- Develop a project charter and a project management plan.
- Execute the project plan and manage the project budget.
- Monitor and control the project progress and manage risks.
- Close the project and evaluate the project performance.

## Topics

The course covers the following topics:

- Project Management Fundamentals
- Project Initiation
- Project Planning
- Project Execution
- Project Monitoring and Control
- Project Closure

## Prerequisites

There are no prerequisites for this course. However, it is recommended that students have a basic understanding of business and management concepts.

## Materials

The course materials include a textbook, lecture notes, and case studies. The textbook is available in both print and digital formats.

## Methodology

The course is delivered through a combination of lectures, case studies, and group exercises. Students are encouraged to participate actively in the learning process.

## Assessment

Students will be assessed through a combination of quizzes, assignments, and a final exam. The final exam will cover all the topics covered in the course.

## Course Content

### Module 1: Introduction to Project Management

This module introduces the fundamentals of project management, including the definition of a project, the role of the project manager, and the project lifecycle.

### Module 2: Project Initiation

This module covers the process of initiating a project, including identifying the project's purpose, scope, and objectives.

### Module 3: Project Planning

This module covers the process of planning a project, including developing a project management plan, a project charter, and a project budget.

### Module 4: Project Execution

This module covers the process of executing a project, including managing the project budget, managing the project team, and managing the project risks.

### Module 5: Project Monitoring and Control

This module covers the process of monitoring and controlling a project, including tracking project progress, managing project risks, and managing project communication.

### Module 6: Project Closure

This module covers the process of closing a project, including evaluating project performance, documenting project lessons learned, and archiving project documents.

### Module 7: Project Management Tools

This module covers the use of various project management tools, including Gantt charts, PERT charts, and project management software.

### Module 8: Project Management Case Studies

This module covers several case studies of successful and unsuccessful projects, providing students with practical examples of project management.

## Course Objectives

### Learning Objectives

By the end of this course, students will be able to:

### Knowledge Objectives

Students will be able to identify the key components of a project and the roles of the project manager. They will also be able to develop a project charter and a project management plan.

### Skills Objectives

Students will be able to execute the project plan and manage the project budget.

Students will be able to monitor and control the project progress and manage risks.

Students will be able to close the project and evaluate the project performance.
