Fitch, *The Motor Car Industry in Coventry Since the 1890's* David Thoms, Tom Donnelly, 2017-07-06 This book originally published in 1985 examines the development of the car industry in Coventry within both its local context and the wider economic environment It is a study of expansion and adjustment which reflects the broader pattern of Britain's industrial history The book analyses the emergence and early dominance of Coventry's motor manufacturers the appearance of the volume producers in the 1920s and the instability of the post war era The relationship between cars and other sectors of the local economy particularly cycles machine tools and aircraft is discussed while the significance of the two world wars receive special attention Extensive use is made of original sources material much of which prior to publication had received little or no attention from business historians **Annals of the Army of the Cumberland** John Fitch, 1864 Recounts various events reports officers and others involved with the Army of the Cumberland **Experience and Identity** John Money, 1977 **Coventry** Frederick Taylor, 2016 On the evening of Thursday 14 November 1940 began the most severe bombing to hit Coventry during the Second World War This raid represented a new kind of air warfare one which sacrificed any immediate military goals and instead focused on obliterating all aspects of city life By playing down the fact that Coventry was an industrial city and key centre for British armaments and therefore a fair target attention was drawn to the destruction of an ancient historic town and the total indifference of the bombers to civilian casualties in this way the systematic bombing of this city was successfully exploited by the British by several means Initially the media used reports and horrific images to tip American opinion away from isolationism and in favour of help for Britain Also while the politicians and military establishment were furiously condemning this raid in public they were busily appreciating the effectiveness of this method Finally the German tactics provided not only a blueprint for obliteration but also allowed the Allied forces to justify later bombing raids of Germany which resulted in over half a million victims many of whom were civilians Frederick Taylor draws upon numerous sources to reveal the true repercussions of the bombing of Coventry in November 1940 He teases out the truth behind the persistent rumours and conspiracy theories that Coventry may have been left undefended to protect Britain's knowledge of the Enigma codes This major work of history assesses this significant turning point in modern warfare considers how it affected Britain's status in the war and looks at whether this attack really could provide justification for the horror of Dresden 1945 Book jacket **A Geographical Dictionary of England and Wales** William Cobbett, 1832 **A Geographical Dictionary of England and Wales ...
