Covering China:

Covering China Ralph Izard, 2018-01-18 The relationship between China and the United States has been marked by a lack of mutual comprehension that stretches from America's missionary paternalism in the early twentieth century to the fears and fascinations of the present Throughout the twentieth century China has attracted the attention of American journalists from the first China hands who covered an ancient country lurching into the modern world to the chroniclers of World War II and the Chinese civil war to the reporters who today explore the contradictions of China's economy Covering China looks at the questions, concerns and conceptions of all the generations of American reporters against the backdrop of Chinese history and China's own media Covering China is divided into three sections Histories takes up the events, anniversaries and processes that have shaped Chinese and American media coverage over the century Included here are chapters focusing on the civil war and analyzing American reporting in the 1930s and 1940s in their many viewpoints as well as in the decades when China was closed to American journalists Other chapters consider the influence on journalism of various political movements from the anti Western May 4th movement of 1918 to the Tiananmen Square protests of 1989 Communicating explores the challenges of explaining China to Americans and America to the Chinese Among the topics covered here are the Chinese media reaction to the Clinton scandal the status of Hong Kong as a window between China and the West Communist efforts to control public opinion in the media and the pioneering role of Pearl S Buck in interpreting China for American readers The concluding section Issues examines important stories now emerging in China that will matter to both journalists and China watchers including the changing roles of Chinese women little covered instances of ethnic unrest and the complexities of economic and environmental stories The variety of points of view expressed in Covering China is a testament to the vigor of contemporary writing on China As one contributor notes American media coverage of China needs to challenge existing assumptions and be ready for the unexpected By doing so journalists can minimize the sense of shock that erupts in America at each swing of Chinese history Covering China will be of interest to China area specialists, journalists and cultural historians Robert W Snyder is managing editor of the Media Studies Journal a historian and author of Transit Talk New York's Bus and Subway Workers Tell Their Stories He has taught at Princeton University and New York University

Covering China from Cyberspace in 2014 China Digital Times, 2015-01-15 Covering China from Cyberspace in 2014 reviews the year's major events as seen through the eyes of Chinese censors and the netizens who are brave enough to defy them A crackdown on free speech and activism that began as soon as President Xi Jinping took office in 2012 only intensified and broadened throughout 2014 A steady stream of filtered search terms and propaganda directives guided coverage and discussion of a broad variety of topics and stories from Xi's visit to a steamed bun shop to the arrest of former security chief Zhou Yongkang The 25th anniversary of June 4th and the protest movement in Hong Kong were both among the most strictly censored stories in China in recent memory But the harsh tactics used by authorities to silence their

critics did not work to intimidate the most outspoken Internet users who continued to find creative ways to express themselves This yearbook is not an effort to chronicle everything that happened in China this past year Rather it provides a unique lens on some of the biggest stories in China in 2014 by compiling the best of the news reports analysis Internet commentary propaganda directives cartoons and other images Covering China from Cyberspace in 2014 is a valuable resource for China analysts journalists students and others who wish to broaden their knowledge and understanding of recent events in the country

The China Reader David L. Shambaugh, 2016 The rise of China is the most significant development in world affairs in this generation No nation in history has risen as quickly or modernized as rapidly as has China over the four decades This sixth edition of The China Reader chronicles the diverse aspects of this transition since the late 1990s It is comprehensive in scope and draws upon both primary Chinese sources and secondary Western analyses written by the world's leading experts on contemporary China Perfectly suited as both a textbook for students as well as for specialists and the public alike the volume covers the full range of China's internal and external developments During the past three decades China dramatically modernized its economy and taken a position as one of the two major powers in the world Its mega economy has skyrocketed to being the second largest in the world and will soon surpass the United States on aggregate The physical transformation of the country has been extraordinary to witness with infrastructure development unparalleled in human history Modern cities featuring futuristic architecture have literally risen from farmland across the country As China has developed domestically it has also taken its place as a major power on the world stage Whether in its relations with other powers the United States Russia and European Union with its neighbors in Asia or other countries across the world China is now a major factor in international relations Its businesses are going global and its people are establishing their footprint from Antarctica to outer space For all its newfound

prowess China's rise has not been a smooth process Domestically the nation's juggernaut economy has produced numerous negative social and environmental side effects Its political system remains anachronistic and authoritarian with substantial repression Externally Beijing's rapid military modernization and regional territorial claims have alarmed China's neighbors Its relationship with the United States is complex and increasingly strained And its soft power remains limited Still the rise of China is the story of the current era The China Reader is a perfect window into the complexities of this historic process

Brandle, 2015-12-22 Does the CNN Effect exist Political communications scholars have debated the influence of television news coverage on international affairs since television news began especially in relation to the coverage of massive human rights violations These debates have only intensified in the last 20 years as new technologies have changed the nature of news and the news cycle But despite frequent assertion little research into the CNN Effect or whether television coverage of human rights violations causes state action exists Bridging across the disciplines of human right studies comparative politics and communication studies in a way that has not been done this book looks at television news coverage of human rights in the US and UK to answer the question of whether the CNN Effect actually exists Examining the human rights content in television news in the US and UK yields insights to what television news producers and policy makers consider to be human rights and what if anything audiences can learn about human rights from watching television news After reviewing 20 years of footage using three different types of content analyses of American television news broadcasts and two different types of British news broadcasts and comparing those results with human rights rankings and print news coverage of human rights Shawns M Brandle concludes that despite rhetoric from both countries in support of human rights there is not enough coverage of human rights in either country to argue that television media can spur state action on human rights issues More simply the violations will not be televised A welcome and timely book presenting an important examination of human rights coverage on television news **Annual Report of the Director of Bureau of Foreign and Domestic Commerce to the**
