Quantitative Models for Value-Based Supply Chain Management Marcus Brandenburg, 2012-10-24 Supply chain management SCM strives for creating competitive advantage and value for customers by integrating business processes from end users through original suppliers However the question of how SCM influences the value of a firm is not fully answered Various conceptual frameworks that explain the coherence of SCM and company value comprehended as value based SCM are well accepted in scientific research but quantitative approaches to value based SCM are found rather seldom The book contributes to this research gap by proposing quantitative models that allow for assessing influences of SCM on the value of a firm Opposed to existing models that limit the observation to chosen facets of SCM or selected value drivers this holistic approach is adequate to reflect configurational and operational aspects of SCM cover all phases of the product life cycle financially compare value impacts of profitability related and asset related value drivers and assess influences of dynamics and uncertainties on company value

Customer Equity Analyses Kay-Oliver Bunn, 2009-04 Diploma Thesis from the year 2008 in the subject Business economics Marketing Corporate Communication CRM Market Research Social Media grade 1.7 University of Applied Sciences Essen language English abstract Corporate management today is exposed to an area of conflict that allows only limited latitude On the one hand top management is regularly faced with the company owners requests for an appropriate return on equity or Shareholder Value a request that executives of public companies are mostly obliged to by contract Corporate Mission Statements proclaiming the responsibility of management is to maximize shareholder s total return via dividends and increases in the market price of the company s shares around On the other hand increasingly mature and well informed customers demand more and more customized goods for their individual requirements and are often known to change their buying behavior quickly This behavior forces many organizations to an uncompromising orientation towards Customer Value and a strict customer focus in both corporate planning and management in order to further develop

competitive advantages and to satisfy and retain valuable customers This is particularly true for middle and lower management Hence value creation for customers finds itself opposed to value creation for shareholders A conflict that appears to find its resolution only in a consequent consideration of customer relationships as investment objects whose continuation or intensification must be justified through an evaluation of economic efficiency Against this background systematic customer valuations become indispensable in order to obtain segmented and efficient market development and to enable a supplier to substantially ensure the availability of the critical resource customers Based on the fundamentals of value based management theory value based marketing and the reciprocal character of customer orientation the author examines the coheren
