   Arms Diffusion Thomas W. Zarzecki,2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company   *Arms Diffusion* Thomas W. Zarzecki,2018-12-20 Weapons proliferation is one of the most pressing global concerns following the end of the Cold War Despite the absence of an overarching superpower conflict armaments and related technologies have continued to spread throughout the international system This has been particularly true in areas like East Asia and the Middle East where the traditional two party arms races are not readily apparent This text addresses these concerns and shortcomings using data on fourteen specific military technological innovations that diffused throughout the international system from 1960 to 1997   *The Diffusion of Military Technology and Ideas* Emily O. Goldman,Leslie C. Eliason,2003 Antologi Sikkerhedspolitiske forskere giver deres vurdering af f lgerne af informationsalderens opg r med hidtidig kendt v benteknologi og doktriner i forbindelse med den globale spredning af know how p omr det   **The Handbook on the Political Economy of War** Christopher J. Coyne,Rachel L. Mathers,2011-01-01 The Handbook on the Political Economy of War highlights and explores important research questions and discusses the core elements of the political economy of war   **The Globalization of Political Violence** Richard Devetak,Christopher W. Hughes,2007-12-18 The events of the 11th of September 2001 revealed most dramatically that globalization has a shadow While large sections of the world s population enjoy the perceived benefits of globalization others seek to utilize globalization for their own politically violent purposes If 9 11 demonstrated anything it is that globalization can as readily facilitate violence and insecurity as it can produce stability prosperity and political order This edited volume offers important new methodological and multi disciplinary insights into the study of globalization and political violence It brings together studies from various disciplines in order to address the precise nature of the relationship between globalization and political violence as it seeks to offer new theoretical and empirical understandings of the types of actors involved in political violence either as perpetrators or victims Examples of the studies include the changing character of state militaries and state to state conflict under globalization the emergence of new wars fuelled by globalization the role of state militaries in intervention new forms of violence directed by states against refugees and anti globalization protesters the role of terrorist actors post 9 11 networks for the proliferation of weapons of mass destruction and the rise of private military firms amongst others The Globalization of Political Violence will be of interest to students and researchers of politics international relations security studies and international political economy   *Power to the People* Audrey Kurth Cronin,2020 Never have so many possessed the means to be so lethal The diffusion of modern technology robotics cyber weapons 3 D printing autonomous systems and artificial intelligence to ordinary people has given them access to weapons of mass violence previously monopolized by the state In recent years states have attempted to stem the flow of such weapons to individuals and non state groups but their efforts are failing Based on hard lessons from previous waves of weapons technology such as dynamite and the assault rifle Power to the

China's Military Procurement in the Reform Era Yoram Evron,2015-06-26 The decisions that shape the policy of weapons procurement are an important area of national security policy This is all the more true for China which during recent decades has vacillated between different sources and directions of military build up This book explores the politics of military procurement in China under the successive leaderships of Deng Xiaoping Jiang Zemin and Hu Jintao It shows how China s political and military leaders have sought to adjust military procurement policy to meet China s strategic objectives to relate it to non military needs to strike a balance between the import of weapons and indigenous production and to determine the connections between hardware and other components of military power Exploring in detail five major shifts in the nation s military procurement it traces the considerations and negotiations among China s civilian and military leaderships By doing so it offers both a conceptual framework and empirical grounds for evaluating the factors that shape China s military procurement directions as well as their limitations prospects and operational implications As the first book to study comprehensively and systematically the attributes shaping China s military procurement it will be of great interest to students and scholars of Chinese politics Chinese history and military and strategic studies The Arms Dynamic in World Politics Barry Buzan,Eric Herring,1998 Presented as a successor to the Cold War era book An Introduction to Strategic Studies this volume explores issues of military security through a framework that links the issues of technology and world politics Arguing that the technological aspect of the global strategic environment is partway through a centuries long process of transformation sped up by the advent of the information age the authors examine such issues as different levels of industrial development on security what they argue is the relative infrequency of the use of force between states the use of military threats such as mass destruction concepts that military means create problems in themselves such as fear of war and insecurity and finally ways in which regulatory schemes such as disarmament can be put to use to solve some of those problems Paper edition unseen 22 50 Annotation copyrighted by Book News Inc Portland OR *Treating Weapons Proliferation* D. Santoro,2010-03-01 Treating Weapons Proliferation is a chilling exploration of the dynamics of weapons proliferation and nonproliferation In an analogy with the disease of cancer the book walks the reader through the history of the phenomenon with its growing complexities and changing dimensions Globalization and WMD Proliferation James A. Russell,James J. Wirtz,2009-12-04 This edited volume explores the relationship between the accelerating process of globalization and the proliferation of Weapons of Mass Destruction which is increasingly seen as the pre eminent threat to international security The proliferation of Weapons of Mass Destruction has traditionally been seen as a function of the security dilemma in the state based international system But the advent of the nuclear supply network pieced together by the Pakistani scientist A Q Khan represented a departure from this model involving a variety of organizations not directly connected to a state This volume assembles an international group of experts in order to assess the relationship between

proliferation and globalization to ascertain how contemporary communication transportation and financial networks are facilitating or constraining trade in dangerous contraband The book ultimately seeks to determine whether globalization is fundamentally altering the nature of the proliferation problem particularly the threat that Weapons of Mass Destruction might fall into the hands of terrorists This book will be of much interest to students of nuclear proliferation international security terrorism and IR in general   *Indonesia's Defense Economy Reform* Andi Widjajanto,2006   <u>Military Review</u> ,1994   *Influence without Arms* Matthew Fuhrmann,2024-11-14 How does nuclear technology influence international relations While many books focus on countries armed with nuclear weapons this volume puts the spotlight on those that have the technology to build nuclear bombs but choose not to These weapons capable countries such as Brazil Germany and Japan have what is known as nuclear latency and they shape world politics in important ways Offering a definitive account of nuclear latency Matthew Fuhrmann navigates a critical yet poorly understood issue He identifies global trends explains why countries obtain nuclear latency and analyzes its consequences for international security Influence Without Arms presents new statistical and case evidence that nuclear latency enhances deterrence and provides greater influence but also triggers conflict and arms races The book offers a framework to explain when nuclear latency increases security and when it incites instability and generates far reaching implications for deterrence nuclear proliferation arms races preventive war and disarmament   <u>Professional Journal of the United States Army</u> ,1994   **Precision Strike Warfare and International Intervention** Mike Aaronson,Wali Aslam,Tom Dyson,Regina Rauxloh,2014-09-15 This book explores whether the new capabilities made possible by precision strike technologies are reshaping approaches to international intervention Since the end of the Cold War US technological superiority has led to a more proactive and some would argue high risk approach to international military intervention New technologies including the capacity to mount precision military strikes from high level bombing campaigns and more recently the selective targeting of individuals from unmanned aerial vehicles UAVs have facilitated air campaigns supported by Special Forces without the commitment of large numbers of troops on the ground Such campaigns include for example NATO s high level aerial bombardment of Milosevic s forces in Kosovo in 1999 and of Gaddafi s in Libya in 2011 and the US operation involving Special Forces against Osama Bin Laden The development of UAVs and electronic data intercept technologies has further expanded the potential scope of interventions for example against Islamic militants in the tribal areas of Pakistan This volume examines three key and interrelated dimensions of these new precision strike capabilities 1 the strategic and foreign policy drivers and consequences 2 the legal and moral implications of the new capabilities and 3 the implications for decision making at the strategic operational and tactical levels This book will be of much interest to students of war and technology air power international intervention security studies and IR
