Arquitectura En Madera:

Living with Wood Claudia Martínez Alonso, 2014 Los arquitectos y diseñadores utilizan la madera en construcción porque proporciona unas posibilidades de diseño exterior y decoración infinitas. En la actualidad la gran variedad de maderas y el reciclaje de las mismas permiten la planificación de virtuosos y variados proyectos arquitectónicos. La madera se considera uno de los mejores materiales para la construcción debido a su versatilidad y su gran capacidad como aislante térmico y acústico. Su marcado carácter ecológico, su aspecto clásico, su luminosidad, etc. Este libro es una recopilación de diferentes tipologías constructivas tales como segundas residencias, casas prefabricadas, cabinas, refugios, guarderías, cafés, etc. que a menudo están diseñados tradicionalmente con modernas y contemporáneas creaciones de diferentes estilos. Propuestas canadienses, centroeuropeas, mediterráneas y norteamericanas son mostradas a través de imágenes de gran formato y planos detallados además de textos explicativos centrados en la utilización de madera.

Arquitectura de madera Will Pryce, 2006-09-18 Will Pryce ha viajado por todo el mundo buscando lo más famoso y lo menos conocido, destacando monumentos tan familiares como templos japoneses, iglesias noruegas medievales de madera y las casas pintadas de San Francisco, aunque descubre también edificios desconocidos nunca antes reproducidos. Este libro es por tanto una importante contribución a la historia de la arquitectura, además de un estimulante viaje visual. Se ha dedicado una extensa investigación a la explicación de los aspectos técnicos y al trasfondo cultural de los edificios de madera. Acompañado de un texto riguroso, Pryce muestra cómo el maravilloso legado en madera de Japón creció a partir de su historia budista, como los carpinteros rusos optaron por sus técnicas culposas en forma de cebolla, y cómo en la actualidad arquitectos sofisticados como Peter Zumthor y Renzo Piano inventan una nueva y elocuente arquitectura de madera con originalidad e instinto.

Arquitectura ferroviaria Jorge Tartarini, 2001 **La memoria histórica de Cantabria** José Ángel García de Cortázar y Ruiz de Aguirre, 1996 **El arte de construir con madera** Nottoli Hernán, 2023-03-15 Este libro es el resultado de trabajos de investigación desarrollados en la Facultad de Arquitectura, Diseño y Urbanismo de la Universidad de Buenos Aires. Los trabajos constituyen un valioso aporte al tema tratado y un ejemplo destacado de la producción grupal que se genera en el ámbito de la FADU como parte del proceso de enseñanza-aprendizaje que se logra con el esfuerzo conjunto de docentes y alumnos. La supervisión directa y el seguimiento de la tarea realizada estuvieron en manos del Profesor Titular de Cátedra Dr. Arq. Hernán Nottoli, quien asimismo estuvo a cargo de darle formato de libro a la versión final. Es destacable asimismo sealar que si bien existe una muy variada bibliografía sobre construcción en madera, no es fácil descubrir un texto que sintetice con eficiencia las características de sus particularidades constructivas, los ejemplos que pueden encontrarse en nuestro medio y en el mundo en general y la evolución histórica que fue aconteciendo desde las primeras experiencias con este tipo de material usado prácticamente con la aparición del ser humano moderno hasta su utilización en nuestros días. Por ello otra virtud de este texto es cubrir un espacio de conocimiento pertinente a las posibilidades que un curso de grado en una escuela de diseño puede proporcionar.
