**Informatization and the Public Sector** , 1991      **Reforming International Extradition** Sally Kennedy, Ian Warren, 2024-09-03 This book uses several case studies to demonstrate current problems with international extradition These include political issues time delays jurisdictional problems and conflict between surrender and the human rights of extraditees The normative assumptions underpinning extradition ensure these procedures are more likely to prioritise international comity between nation states rather than individual human rights protections This creates a system with limited judicial relief for extraditees that require extensive proof of high human rights thresholds as well as a prominent rule of non inquiry restrictive evidence regulations and deference to the executive The book argues that a defendant centred approach to extradition reform is needed that prioritises a right to fairness as a core value for promoting global justice This includes considering changes to enable greater post extradition monitoring of extradited people and broadening rules for extraditees to submit evidence to support a claim against surrender New and more viable extradition alternatives also involve transferring evidence to shift the trial to the location where most of the offending activity occurred and sentencing in the extraditee s home jurisdiction These proposals aim to counter the current unequal levels of authority that favour the power of both the requesting and requested state over the rights of the individual      Improving the Adjudication Process Eileen M. and Anonymous and the eventual rehabilitation of hackers who undertake ethical hacking for the state Analyzing the evolution of the state's relationship to hacking they argue that state sponsored hacking ultimately corrodes the rule of law and offers unchecked advantage to those in power clearing the way for more authoritarian rule Follis and Fish draw on a range of methodologies and disciplines including ethnographic and digital archive methods from fields as diverse as anthropology STS and criminology They propose a novel boundary work theoretical framework to articulate the relational approach to understanding state and hacker interactions advanced by the book In the context of Russian bot armies the rise of fake news and algorithmic opacity they describe the political impact of leaks and hacks hacker partnerships with journalists in pursuit of transparency and accountability the increasingly prominent use of extradition in hacking related cases and the privatization of hackers for hire
