Reyes,2024-12-02 For sociologists making distributing and using art and cultural products constitute social practices yet sociologists disagree on how to investigate these practices Organised around three main schools of thought critical sociology symbolic interactionism and social systems theory Sociology about Art serves as an introduction to and a self reflective discussion about how sociologists study the Arts Providing a wide spectrum of approaches in art sociology the book focuses on examining not only the famously cited theorists notably Bourdieu Becker and Peterson but also offers an overview of the sociologists who are often overlooked Hennion Heinrich Luhmann and Van Maanen among others In presenting these various approaches the crux of discussion concerns the status of art in sociological analyses Following a critical assessment of the classical theories and assessing the risks of failing to observe the function of art the authors contend that the perspective on art works their forms affordances and meanings can and should be integrated into sociological research for it to become a sociology that is truly about art A vital resource for students seeking to understand sociological discourses surrounding art and set up their own research projects Sociology about Art will appeal to scholars and students of sociology with interests in the arts and cultural policy

Drawn Toward Transformation Nadine Kalin,2009-01-01 This book examines the transformative potential of collaborative teacher research Specifically Kalin shares the perspectives of educators as they investigate the teaching and learning of drawing within their own elementary classrooms and within the context of an action research group The innovative a r tographic design of the project provides a rich balance between the arts and educational research as it allows for the complex unfolding of relational transformation alongside the artistic renditions of each person exploring their understandings of drawing The products and processes of this book provide alternative approaches for the design of future pre service and in service programs that aim to serve teachers as learners rather than teachers as teachers In this vein the book offers worthy insights into how the arts and collaborative action research groups assist participants in finding other ways of seeing imaging and knowing the world The book will appeal to practitioners teacher educators educational researchers as well as those interested in professional development complexity thinking curriculum studies collaborative action research and arts based educational research methodologies
