Contemporary Art Gallery David Carrier, Darren Jones, 2016-09-23 Everyone who looks at contemporary art is familiar with galleries But visual features of these mysterious temples tend to be taken for granted The basic purpose of this book is to enliven the reader s latent knowledge of galleries including architectural motifs the intended impression that is conveyed to the visitor and human interactions within them The contemporary art world system includes artists studios art galleries homes of collec tors and public art museums To comprehend art one needs to understand these settings and how it travels through them The contemporary art gallery is a store where luxury goods are sold What distinguishes it from stores selling other luxuries upscale clothing jewelry and posh cars is the nature of the merchandise While much has been written about the art this book uncovers the secretive culture of the galleries themselves The gallery is the public site where art is first seen anyone can come and look for free This store a commercial site is where aesthetic judgments are made Art s value is determined in this marketplace by the consensus formed by public opinion professional re viewers and sales The gallery then is the nexus of the enigmatic billion dollar art world and it is that space that is dissected here The first chapter briefly describes the beginnings of the present contemporary art gallery The second presents the experience of gallery going presenting summary accounts of vis its to some contemporary galleries The third expands and extends that analysis with de tailed close up descriptions and comparative evaluations of many diverse contemporary galleries in order to identify the challenges provided by these marvelous places Then the fourth chapter indicates why in the near future due to the proliferation of myriad art fairs and online platforms extant today such galleries might disappear altogether **The Grove**

Jones, 2017-06-01 Global biennials have proliferated in the contemporary art world but artists' engagement with large scale international exhibitions has a much longer history that has influenced the present in important ways Going back to the earliest world's fairs in the nineteenth century this book argues that globalism was incubated in a century of international art contests and today constitutes an important tactic for artists As world's fairs brought millions of attendees into contact with foreign cultures products and processes artworks became juxtaposed in a theater of nations which challenged artists and critics to think outside their local academies From Gustave Courbet's rebel pavilion near the official art exhibit at the 1855 French World's Fair to curator Beryl Madra's choice of London based Cypriot Hussein Chalayan for the off site Turkish pavilion at the 2006 Venice Biennale artists have used these exhibitions to reflect on contemporary art speak to their own governments back home and challenge the wider geopolitical realm changing art and art history along the way Ultimately Caroline A Jones argues the modern appetite for experience and event structures which were cultivated around the art at these earlier expositions have now come

to constitute contemporary art itself producing encounters that transform the public and force us to reflect critically on the global condition European Painting and Sculpture, Ca. 1770-1937, in the Museum of Art, Rhode Island School of Design
