Play and Creativity in Art Teaching George Szekely,2015-03-02 In Play and Creativity in Art Teaching esteemed art educator George Szekely draws on his two classic volumes Encouraging Creativity in Art Lessons and From Play to Art to create a new book for new times The central premise is that art teachers are not only a source of knowledge about art but also a catalyst for creating conditions that encourage students to use their own ideas for making art By observing children at play and using props and situations familiar to them teachers can build on children s energy and self

initiated discoveries to inspire school art that comes from the child's imagination. The foundation of this teaching approach is the belief that the essential goal of art teaching is to inspire children to behave like artists that art comes from within themselves and not from the art teacher. Play and Creativity in Art Teaching offers plans for the study of children's play and for discovering creative art teaching as a way to bring play into the art room. While it does not offer a teaching formula or a single set of techniques to be followed, it demystifies art and shows how teachers can help children find art in familiar and ordinary places accessible to everyone. This book also speaks to parents and the important roles they can play in supporting school art programs and nourishing the creativity of their children. Drawing on the Artist Within Betty

Edwards, 2008-10-09 Whether you are a business manager, teacher, writer, technician, or student, you'll find Drawing on the Artist Within the most effective program ever created for tapping your creative powers. Profusely illustrated with hundreds of instructional drawings and the work of master artists, this book is written for people with no previous experience in art. AH HA I SEE IT NOW! Everyone has experienced that joyful moment when the light flashes on the Ah Ha of creativity. Creativity is the force that drives problem solving, informs effective decision making, and opens new frontiers for ambition and intelligence. Those who succeed have learned to harness their creative power by keeping that light bulb turned on. Now Betty Edwards, author of Drawing on the Right Side of the Brain, the million copy best seller that proved all people can draw well just as they can read well, has decoded the secrets of the creative process to help you tap your full creative potential and apply that power to everyday problems. How does Betty Edwards do this? Through the power of drawing power, you can harness to see problems in new ways. You will learn how the creative process progresses from stage to stage and how to move your own problem solving through these key steps: First insight, Saturation, Incubation, Illumination, the Ah Ha Verification. Through simple step by step exercises that require no special artistic abilities, Betty Edwards will teach you how to take a new point of view, how to look at things from a different perspective, how to see the forest and the trees in short, how to bring your visual perceptual brainpower to bear on creative problem solving. **Studio Thinking from the Start** Jillian

Hogan, Lois Hetland, Diane B. Jaquith, Ellen Winner, 2018-08-24 Students of all ages can learn to think like artists.
