during the nineteenth century And for many Americans such questions about the original inhabitants of their homeland inspired a flurry of historical investigation scientific inquiry and heated political debate History's Shadow traces the struggle of Americans trying to understand the people who originally occupied the continent claimed as their own Steven Conn considers how the question of the Indian compelled Americans to abandon older explanatory frameworks for sovereignty like the Bible and classical literature and instead develop new ones Through their engagement with Native American language and culture American intellectuals helped shape and define the emerging fields of archaeology ethnology linguistics and art But more important the questions posed by the presence of the Indian in the United States forced Americans to confront the meaning of history itself both that of Native Americans and their own how it should be studied what drove its processes and where it might ultimately lead The encounter with Native Americans Conn argues helped give rise to a distinctly American historical consciousness A work of enormous scope and intellect History's Shadow will speak to anyone interested in Native Americans and their profound influence on our cultural imagination History's Shadow is an intelligent and comprehensive look at the place of Native Americans in Euro American's intellectual history Examining literature painting photography ethnology and anthropology Conn mines the written record to discover how non Native Americans thought about Indians Joy S Kasson Los Angeles Times **The Yale Lit** ,1856 *The Heart of the Wild* Ben A. Minteer,Jonathan B. Losos Losos,2024-08-13 Timely and provocative reflections on the future of the wild in an increasingly human world The Heart of the Wild brings together some of today's leading scientists humanists and nature writers to offer a thought provoking meditation on the urgency of learning about and experiencing our wild places in an age of rapidly expanding human impacts These engaging essays present nuanced and often surprising perspectives on the meaning and value of wildness amid the realities of the Anthropocene They consider the trends and forces from the cultural and conceptual to the ecological and technological that are transforming our relationship with the natural world and sometimes seem only to be pulling us farther away from wild places and species with each passing day The contributors make impassioned defenses of naturalism natural history and nature education in helping us to rediscover a love for the wild at a time when our connections with it have frayed or been lost altogether Charting a new path forward in an era of ecological uncertainty The Heart of the Wild reframes our understanding of nature and our responsibility to learn from and sustain it as the human footprint sinks ever deeper into the landscapes around us With contributions by Bill Adams Joel Berger Susan Clayton Eileen Crist Martha L Crump Thomas Lowe Fleischner Harry W Greene Hal Herzog Jonathan B Losos Emma Marris Ben A Minteer Kathleen Dean Moore Gary Paul Nabhan Peter H Raven Christopher J Schell Richard Shine and Kyle Whyte [An Introduction to Nineteenth-Century Art](#) Michelle Facos,2011-02-22 Using the tools of the new art history feminism Marxism social context etc An Introduction to Nineteenth Century Art offers a richly textured yet clear and logical introduction to nineteenth century art and culture This textbook will provide readers with a basic historical framework of the period and the critical tools for

Sanctified Landscape David Schuyler, 2012-04-06 The Hudson River Valley was the first iconic American landscape

Beginning as early as the 1820s artists and writers found new ways of thinking about the human relationship with the natural world along the Hudson Here amid the most dramatic river and mountain scenery in the eastern United States Washington Irving and James Fenimore Cooper created a distinctly American literature grounded in folklore and history that contributed to the emergence of a sense of place in the valley Painters led by Thomas Cole founded the Hudson River School widely recognized as the first truly national style of art As the century advanced and as landscape and history became increasingly intertwined in the national consciousness an aesthetic identity took shape in the region through literature art memory and folklore even gardens and domestic architecture In Sanctified Landscape David Schuyler recounts this story of America s idealization of the Hudson Valley during the nineteenth and early twentieth centuries Schuyler s story unfolds during a time of great change in American history At the very moment when artists and writers were exploring the aesthetic potential of the Hudson Valley the transportation revolution and the rise of industrial capitalism were transforming the region The first generation of American tourists traveled from New York City to Cozzens Hotel and the Catskill Mountain House in search of the picturesque Those who could afford to live some distance from jobs in the city built suburban homes or country estates Given these momentous changes it is not surprising that historic preservation emerged in the Hudson Valley the first building in the United States preserved for its historic significance is Washington s Headquarters in Newburgh Schuyler also finds the seeds of the modern environmental movement in the transformation of the Hudson Valley landscape Richly illustrated and compellingly written Sanctified Landscape makes for rewarding reading Schuyler expertly ties local history to national developments revealing why the Hudson River Valley was so important to nineteenth century Americans and why it is still beloved today

Cultural Landscapes Gabriel R. Ricci, Dualism between man and nature has been a persistent feature of Western thought and spirituality from ancient times to the present The opposition of mind and body consciousness and world has tended to obscure the ways in which humans are ecologically part of interconnected systems some of which are obvious while others operate in hidden but life sustaining ways Cultural Landscapes explores the physical ways in which we are intimately linked to the land and the intellectual and aesthetic connections human consciousness has with the landscape Following the editor's introductory essay the lead article by Jame Schaeffer Quest for the Common Good A Collaborative Public Theology for a Life Sustaining Climate assesses the lightning rod issue of global warming in the context of a public and ecumenical theology and sets the tone for this normative assessment of our relationship with nature Likewise David Kenley's essay Three Gorges be Dammed The Philosophical Roots of Environmentalism in China reveals the traditional philosophical and cultural values that can sustain a vital environmentalism in the East David Brown's historical insights into the use of the American landscape to define historical writing complement Patricia Likos Ricci's historical treatment of nineteenth century landscape painting and the first call to preserve wilderness in the United States Matt Willen An Feochn and David Martinez What Worlds are Made of The Lakota Sense of Place both demonstrate how space is transformed into place through song and mythic tales On a metaphysical note Andreas Philippopoulos Mihalopolos essay On the Line of the Horizon Anxiety in de Chirico's Metaphysical Spaces provides the reader with psychological and existential insights into the disorienting paintings of de Chirico and Gabriel Ricci's concluding essay tours the landscape that underpins Heidegger's ontological speculations The contributions to this volume are posited on the belief that culture society and human history are ultimately rooted in the natural world This integration may explain why humanity has always looked to nature for moral and ethical guidelines Gabriel R Ricci is associate professor of humanities and the chair of the Department of History at Elizabethtown College in Pennsylvania He is
