

The background of the cover is a detailed painting of a jungle scene. In the foreground, an orangutan with reddish-brown fur is shown in profile, looking towards the right. Behind it, a chimpanzee with dark greyish-brown fur is visible, looking slightly upwards and to the right. The background is filled with dark green foliage and leaves, creating a sense of a dense forest.

Cognitive Neuroscience Robotics B Masashi Kasaki,Hiroshi Ishiguro,Minoru Asada,Mariko Osaka,Takashi Fujikado,2016-07-27 Cognitive Neuroscience Robotics is the first introductory book on this new interdisciplinary area This book consists of two volumes the first of which Synthetic Approaches to Human Understanding advances human understanding from a robotics or engineering point of view The second Analytic Approaches to Human Understanding addresses related subjects in cognitive science and neuroscience These two volumes are intended to complement each other in order to more comprehensively investigate human cognitive functions to develop human friendly information and robot technology IRT systems and to understand what kind of beings we humans are Volume B describes to what extent cognitive science and neuroscience have revealed the underlying mechanism of human cognition and investigates how development of neural engineering and advances in other disciplines could lead to deep understanding of human cognition

**Ancestors in Our Genome** Eugene E. Harris (Professor),2015 In 2001 scientists were finally able to determine the full human genome sequence and with the discovery began a genomic voyage back in time Since then we have sequenced the full genomes of a number of mankind s primate relatives at a remarkable rate The genomes of the common chimpanzee 2005 and bonobo 2012 orangutan 2011 gorilla 2012 and macaque monkey 2007 have already been identified and the determination of other primate genomes is well underway Researchers are beginning to unravel our full genomic history comparing it with closely related species to answer age old questions about how and when we evolved For the first time we are finding our own ancestors in our genome and are thereby gleaning new information about our evolutionary past In Ancestors in Our Genome molecular anthropologist Eugene E Harris presents us with a complete and up to date account of the evolution of the human genome and our species Written from the perspective of population genetics and in simple terms the book traces human origins back to their source among our earliest human ancestors and explains many of the most intriguing questions that genome scientists are currently working to answer For example what does the high level of discordance among the gene trees of humans and the African great apes tell us about our respective separations from our common ancestor Was our separation from the apes fast or slow and when and why did it occur Where when and how did our modern species evolve How do we search across genomes to find the genomic underpinnings of our large and complex brains and language abilities How can we find the genomic bases for life at high altitudes for lactose tolerance resistance to disease and for our different skin

pigmentations How and when did we interbreed with Neandertals and the recently discovered ancient Denisovans of Asia Harris draws upon extensive experience researching primate evolution in order to deliver a lively and thorough history of human evolution Ancestors in Our Genome is the most complete discussion of our current understanding of the human genome available

**The War on Science** Lawrence Krauss, 2025-09-25 An unparalleled group of prominent scholars from wide ranging disciplines detail ongoing efforts to impose ideological restrictions on science and scholarship throughout western society From assaults on merit based hiring to

the policing of language and replacing well established disciplinary scholarship by ideological mantras current science and scholarship is under threat throughout western institutions As detailed by this group of prominent scholars who range across many different disciplines and political leanings the very future of free inquiry and scientific progress is at risk Many who have spoken up against this threat have lost their positions and a climate of fear has arisen that strikes at the heart of modern education and research Banding together to finally speak out this brave and unprecedented group of scholars issues a clarion call for change Contributors Richard Dawkins Alan Sokal Niall Ferguson Gad Saad Anna Krylov Jay Tanzman John Armstrong Jerry Coyne Luana Maroja Sally Satel Geoff Horsman Alessandro Strumia Roger Cohen Amy Wax Alex Byrne Moti Gorin Judith Suissa Alice Sullivan Dorian Abbot Steven Pinker Nicholas Christakis Richard E Redding *Evolutionary Psychology* Lance Workman, Will Reader, 2014-01-09 Third edition of the classic undergraduate psychology textbook entirely updated to combine traditional and cutting edge research and additional pedagogical features **More-than-Human Aging** Cristina Douglas, Andrew Whitehouse, 2024-10-11 What does later life look like when it is lived in the companionship of other species Similarly how do other species age or not with humans and what sort of symmetries if any are brought to light around how we understand and think about aging So far aging has been investigated in the social sciences in purely human terms This is the first collection of original work that considers aging as taking place in relation to other species This volume aims to start a conversation about aging by taking its more than human participants seriously that is not only as a support for or context of human aging but also more symmetrically as agents and subjects in the process of aging The contributors draw upon richly descriptive ethnographic accounts including moments of connection between seniors and dogs in a long term care facility human care for aging laboratory animals and robotic companionship in later life The ethnographies in this volume not only enrich our understanding of more than human companionship during the human aging process but also challenge and urge us to rethink what it means to live later in life in ecologically entangled social and moral worlds **The Role of the Indigenous African Psyche in the Evolution of Human Consciousness** Mike Loutzenhiser, 2008 a major work an intellectual and cultural tour de force Loutzenhiser's range in the world of the metaphysicians is sure His sections on the arts are most penetrating and offer original ideas and insights Edward Bruce Bynum author of *The African Unconscious* Director of Behavioral Medicine University of Massachusetts Amherst I was impressed with the range of issues and thinkers covered It is a rare thinker who can find the thread that connects hegelian phenomenology transpersonal psychology holonic theory the chakra system the prose of Jack Kerouac and the music of Sun Ra Samuel Oluoch Imbo author of *An Introduction to African Philosophy* thought provoking thoroughgoing Nikitah Okembara Imani associate professor of Sociology Africentric Critical Studies James Madison University brilliant and intriguing ideas Loutzenhiser's mind is amazing vigorous and rich John Davis professor of Transpersonal Psychology Naropa University important Molefi Kete Asante author of *The Afrocentric Idea* **Kindness Wars** Noel A. Cazenave, 2023-09-15 Kindness

Wars rescues our understanding of kindness from the clutches of an intellectually and morally myopic popular psychology and returns it to the stage of big ideas in keeping with the important Enlightenment era debates about human nature and possibilities Cazenave conceptualizes kindness not just as a benevolent feeling a caring thought or a generous action but as a worldview a theory or an ideology that explains who we are and justifies how we treat others Here kindness wars refer to the millennia old kindness theory and ideological conflicts over what kind of societies humans can and should have The book's title denotes the two types of kindness wars it analyzes conflict over 1 whether to be kind or not i.e. the conflicts between kindness and other societal values and ideologies and 2 what it means to be kind i.e. the wars within kindness over different ideas as to what it means to be kind and to whom Using a conflict theoretical perspective Kindness Wars examines the history of the kindness concept its many struggles with opposing notions of our true nature and possibilities and what the lessons of that history and those battles offer us toward the development of a large robust and politically engaged conceptualization of kindness

**Introduction to the History of Communication** Terence P. Moran, 2010 An Introduction to the History of Communication Evolutions and Revolutions provides a comprehensive overview of how human communication has changed and is changing Focusing on the evolutions and revolutions of six key changes in the history of communication becoming human creating writing developing print capturing the image harnessing electricity and exploring cybernetics the author reveals how communication was generated stored and shared This ecological approach provides a comprehensive understanding of the key variables that underlie each of these great evolutions revolutions in human communication Designed as an introduction for history of communication classes the text examines the past attempting to identify the key dynamics of change in these human technical semiotic social political economic and cultural structures in order to better understand the present and prepare for possible future developments **BOOK JACKET** *Four Questions on Visual Self-recognition* David Butler, 2015-10-19 Whether we like to admit it or not most of us care about our own appearance we spend some of each day in front of mirrors invest our hard earned money on grooming ourselves for both business and pleasure and are increasingly prone to taking selfies The basis of such behaviours is self recognition the process of identifying our own physical appearance Over the last 200 years this seemingly mundane ability has become increasingly subject to investigation by social scientists who are attempting to tease out some of its associated complexities How do we recognize ourselves Does it involve self awareness When does it develop Which species do and do not show self recognition How does the brain perform self recognition What is the evolutionary value if any of self recognition Very few clear cut answers exist for these questions perhaps most problematic is the absence of consensus about how the brain underlies self recognition This book provides a broad multidisciplinary theoretical framework and an extensive overview concerning these issues which in conjunction with the advocacy and execution of novel experimental paradigms ultimately offers researchers an example of how to further clarify our understanding not only for the neural basis of self recognition but also its

development mechanisms and function      *Genocides by the Oppressed* Nicholas A. Robins, Adam Jones, 2009-05-12 In the last two decades the field of comparative genocide studies has produced an increasingly rich literature on the targeting of various groups for extermination and other atrocities throughout history and around the contemporary world However the phenomenon of genocides by the oppressed that is retributive genocidal actions carried out by subaltern actors has received almost no attention The prominence in such genocides of non state actors combined with the perceived moral ambiguities of retributive genocide that arise in analyzing genocidal acts from below have so far eluded serious investigation *Genocides by the Oppressed* addresses this oversight opening the subject of subaltern genocide for exploration by scholars of genocide ethnic conflict and human rights Focusing on case studies of such genocide the contributors explore its sociological anthropological psychological symbolic and normative dimensions
