Cases on Models and Methods for STEAM Education Bazler, Judith Ann, Van Sickle, Meta Lee,2019-09-27 STEAM education can be described in two ways One model emphasizes the arts and is not as concerned about the accuracy of the STEM fields In the second model STEM content is the prevailing force with a focus on accuracy and the arts are used in limited and secondary resources for the teaching of the content However in order to promote creative thinking allow for higher student engagement and offer a more well rounded education a STEAM model where science technology engineering arts and mathematics are equal contributors to the process of learning is needed *Cases on Models and Methods for STEAM Education* is an important scholarly resource that provides inclusive models and case studies highlighting best techniques and practices for implementing STEAM models in teaching and assists teachers as they learn to use such methods through the inclusion of practical activities for use in the classroom Highlighting a wide range of topics such as science education fine arts and teaching models this book is essential for educators administrators curriculum developers instructional designers policymakers academicians researchers and students

Handbook of School Mental Health Steven W. Evans, Julie Sarno Owens, Catherine P. Bradshaw, Mark D.

Weist, 2023-02-28 The handbook provides thoughtful and provocative critiques of the science and practice of school mental health. It examines intervention science and implementation science and the study of professional development and stakeholder engagement. The volume outlines the relevant issues facing the field of school mental health and provides a framework for the areas of study. Chapters critique the science in a specific area, draw innovative connections between findings, and present new information about their area of expertise. This handbook provides a concise and critical update of the literature in school mental health and is an essential resource for those from the wide range of disciplines that constitute the science and practice of school mental health. Key topics featured include Promoting meaningful engagement and leadership in school mental health by diverse stakeholders, Training, coaching, and workforce development in school mental health, Intervention science for children with specific needs (e.g., anxiety, depression, trauma, autism), Innovations in scaling up, and Implementation science focusing on such topics as multitiered systems of support and scaleup of positive behavior support strategies. The handbook is an essential reference for researchers, graduate students, and other professionals in child and school psychology, special and general education, public health, school nursing, occupational therapy, psychiatry, social work, and counseling, educational policy, and family advocacy.

Materials, Techniques and Methods in Teaching Psychology in Indiana Secondary Schools Paul Ray McNeely, 1958 *How Finns Learn Mathematics and Science*

, 2007-01-01 The Finnish students' success in the first PISA 2000 evaluation was a surprise to most of the Finns, and even people working in teacher education and educational administration had difficulties to believe that this situation would continue. Finland's second success in the next PISA 2003 comparison has been very pleasing for teachers and teacher educators and for education policymakers. The good results on the second time waked us to think seriously on possible reasons for the success. Several international journalists and expert delegations from different countries have asked these reasons while visiting in Finland. Since we had no commonly acceptable explanation to students' success, we decided at the University of Helsinki to put together a book *How Finns Learn Mathematics and Science* in order to give a commonly acceptable explanation to our students' success in the international PISA evaluations. The book tries to explain the Finnish teacher education and school system as well as Finnish children's learning environment at the level of the comprehensive school and thus give explanations for the Finnish PISA success. The book is a joint enterprise of Finnish teacher educators. The explanations for success given by altogether 40 authors can be classified into three groups: Teacher and teacher education, school and curriculum, and other factors like the use of ICT and a developmental project LUMA. The main result is that there is not one clear explanation, although research-based teacher education seems to have some influence. But the true explanation may be a combination of several factors.
