**Impact of Disruptive Technologies on the Sharing Economy** Gaol, Ford Lumban, Filimonova, Natalia, Acharya, Chandan, 2021-06-25 Because it continually implements entrepreneurial creativity and innovative business models the economic landscape is ever changing in today's globalized world As consumers become more willing to accept new strategic trends this has led to the emergence of disruptive technologies Since this equipment has an insufficient amount of information and high risks it is necessary to assess the potential of disruptive technologies in the commercial environment Impact of Disruptive Technologies on the Sharing Economy provides emerging research exploring the theoretical and practical aspects of disruptive technologies and knowledge based entrepreneurial efforts and applications within management business and economics Featuring coverage on a broad range of topics such as consumer ethics corporate governance and insurance issues this book is ideally designed for IT specialists IT consultants software developers computer engineers managers executives managing directors students professors scientists professionals industry practitioners academicians and researchers seeking current research on the consequences of disruptive technologies

Smart Robust Operation and Trading of Integrated Energy Systems with Low Pollution Goals Kaiping Qu, Yue Zhou, Xin Fang, Shuli Wen, Shiwei Xie, 2024-09-23 To mitigate two major environmental concerns of global warming and air pollution renewable energies with uncertainty are increasingly deployed in power systems which challenge the system's secure operation A single system usually has limited adjusting ability In contrast integrated energy systems such as electricity gas electricity traffic electricity heat and transmission distribution coordinated systems enhance the regulating ability of renewable energy accommodation and environmental protection The operation of integrated energy systems will meet three essential requirements low pollution attribute robustness and cooperativity However the diversity of uncertainty conditions the complementarity of new energy accommodation among systems the conflict of interest between systems and the dispatch autonomy of systems challenge the requirements mentioned above The main goal of this Research Topic includes 1 Propose more effective trading mechanisms or control strategies for carbon and air pollutant emissions 2 Fully use complementary effects between electric power natural gas heat hydrogen and traffic systems 3 Realize the coordinated operation of integrated energy systems with limited information interaction and ensured dispatch autonomy 4 Improve the robustness of integrated energy systems under diversified uncertainty conditions 5 Apply data based reinforcement learning methods for the dynamic decision of smart integrated energy systems under complex environments

**Renewable Energy Integration** Lawrence E. Jones, 2014-06-12 Renewable Energy Integration is a ground breaking new resource the first to offer a distilled

examination of the intricacies of integrating renewables into the power grid and electricity markets It offers informed perspectives from internationally renowned experts on the challenges to be met and solutions based on demonstrated best practices developed by operators around the world The book s focus on practical implementation of strategies provides real world context for theoretical underpinnings and the development of supporting policy frameworks The book considers a myriad of wind solar wave and tidal integration issues thus ensuring that grid operators with low or high penetration of renewable generation can leverage the victories achieved by their peers Renewable Energy Integration highlights carefully explains and illustrates the benefits of advanced technologies and systems for coping with variability uncertainty and flexibility Lays out the key issues around the integration of renewables into power grids and markets from the intricacies of operational and planning considerations to supporting regulatory and policy frameworks Provides global case studies that highlight the challenges of renewables integration and present field tested solutions Illustrates enabling and disruptive technologies to support the management of variability uncertainty and flexibility
