The Business of Reforming American Schools Denise Gelberg, 1997-10-02 Focusing on the influence of the business community on schools this book describes how popular business management theories and production processes have been imported into schools during periods of societal upheaval in order to create a sense of order and efficiency while meeting the objective of producing a workforce that meets the specifications set down by employers Unlike other books that say why schools need to be reformed or how that reform should proceed this study takes a critical look at the latest call to restructure schools in light of the economic social and political forces that affect the education establishment and the children of our nation

The Transformation of Plantation Politics Sharon D. Wright Austin, 2012-02-16 The Transformation of Plantation Politics explores the effects of black political exclusion the sharecropping system and white resistance on the Mississippi Delta s current economic and political situation Sharon D Wright Austin s extensive interviews with residents of the region shed light on the transformations and legacies of the Delta s political and economic institutions While African Americans now hold most of the major political offices in the region and are no longer formally excluded from political participation educational opportunities or lucrative jobs Wright Austin shows that white wealth and black poverty continue to be the norm partly because of the deeply entrenched legacies of the Delta s history Contributing to a greater theoretical understanding of black political efforts this book demonstrates a need for a strong level of black social capital intergroup capital financial capital political capital and a human capital of educated and skilled workers

Extremes Of Mobility: Development And Consequences Of Transport Policy In Los Angeles Stefan Bratzel, 2023-10-06 The development of transportation policy in Los Angeles is a history of extremes in the 1920s the city had the largest regional rail network in the world which was completely abolished 40 years later In its place a vast network of freeways was built in the metropolis with a car focused mobility pattern Los Angeles became a symbol of car oriented mobility with all the negative ecological and social side effects Since the 1990s Los Angeles has been rebuilding its public rail transport with little success so far This book examines the history of Los Angeles development and identifies the key drivers that have shaped the metropolis extreme transport policies With other cities facing similar albeit less extreme transportation issues they can learn from how Los Angeles had responded and continues to adapt to its considerable transport policy problems especially in order to avoid the mobility experiences faced by the American city But to do so it is necessary to abandon the prevailing perspective which is largely limited to evaluating transport modes road versus rail A sustainable solution to the problems of metropolitan areas will only be possible if the origins of transport with their spatial social and economic interdependencies are understood and integrated into transport policy action

Nivola,2002-08-21 Despite widespread urban revitalization and renewal Americans still prefer the suburbs to the cities While many of the underlying causes of the urban predicament are familiar there is also the less recognized possibility that regulatory policies of the federal government disadvantage the cities and ultimately burden their ability to attract residents and businesses This book encourages renewed reflection on the suitable balance between national and local domains **The Balmorhea Project** Steve Bogener,1993 *Marketing Information* Michael R. long and arduous pilgrimage to liberty **Public Policy in an Entrepreneurial Economy** Zoltan J. Acs, Roger R. Stough, 2008-07-03 In recent years there has been increased focus on understanding the dynamic relationships among entrepreneurship policymaking and economic growth At the heart of research debate and practical application is the question Under what conditions can entrepreneurship flourish And the corollary To what degree does encouraging entrepreneurship result in economic growth A popular response is to argue for entrepreneurship policy that is targeted policies that are designed to promote innovation entrepreneurship and small business creation To the editors and contributors of this volume that approach is fundamentally flawed They argue that there is no such thing as a discrete entrepreneurship policy instead there is only policymaking in the context of an entrepreneurial economy The book addresses policies operating at the individual national regional and international levels and offers a unique perspective on several institutional structures that enhance entrepreneurship and economic growth **Religious Interests in Community Conflict** Paul A. Djupe, Laura R. Olson, 2007 This volume investigates some of the most visible issues in American politics today including gay marriage and race along with ongoing concerns that often fly below the radar of the mass media such as healthcare and homelessness The book uncovers and explores the political motivations effectiveness and interplay of organized religious interests as they confront public problems in their local communities
