**EMDR and Family Therapy** Debra Wesselmann, 2025-07-29. A practical guide to treating children suffering from early attachment trauma, now updated and revised. Loss of a parent, separations, abuse, neglect, or a history of a difficult foster or orphanage experience can lead to profound emotional dysregulation in children. Working with these children can feel overwhelming for clinicians. But by integrating EMDR with family therapy, clinicians can strengthen parent-child attachment bonds and help to mend the early experiences that drive a traumatized child's behavior. This manual, an update to Debra Wesselmann's popular *Integrative Team Treatment for Attachment Trauma in Children*, provides clear step-by-step application of the Integrative Attachment Protocol for Children (IATP-C). In this treatment, psychoeducation assists parents in developing trauma-informed responses to their children's challenging behaviors, while family therapy and EMDR therapy deepen children's bonds with parents, improve self-awareness, self-regulation, and self-worth, and assist children with making sense of their traumatic pasts. Any EMDR-trained clinician or any clinician pairing with an EMDR therapist can implement this treatment approach to heal suffering from attachment trauma and offer children and their families a better future.
