14921992 Five Centuries Of Imperialism And Resistance:

American Empire and the Fourth World Anthony J. Hall, 2003-11-10 In *The American Empire and the Fourth World* Anthony Hall presents a sweeping analysis of encounters between indigenous people and the European empires national governments and global corporations on the moving frontiers of globalization since Columbus discovered America How should we respond to the emergence of the United States as the military commercial and cultural centre of a global empire How can we elaborate a global rule of law based on equality and democracy when the world s most powerful polity acknowledges no higher authority in the international arena than its own domestic priorities For Hall the answer lies in the concept of the Fourth World an inclusive intellectual tent covering a wide range of movements whose leaders seek to implement alternative views of globalization Larger than any earlier political movement the Fourth World embraces basic principles that include the inherent rights of self determination and a more just approach to the crafting and enforcement of international law

The American Empire and the Fourth World Anthony J. Hall, Tony Hall, 2005 In a book that Naomi Klein says could change the world Anthony Hall shows that the globalization debate actually began in 1492

Global Iconoclasm: Contesting "Official" Mnemonic Landscapes Michael Ripmeester, Matthew W. Rofo, 2024-06-24 Geographers and others have been long aware that landscapes are neither natural or neutral This is particularly true of landscapes of memory Powerful groups inscribe such landscapes with both a preferred vision of the past and with sets of idealized societal values and morays Yet and despite the authoritative weight such landscapes carry they can

be challenged Even before the monument topplings of 2020 groups across the globe were challenging official memory discourses This volume offers case studies of what might be considered global iconoclasm Drawing upon original international case studies this monograph critically engages with and reveals the dynamics of landscape contestation From the Tsunami Museum of Banda Aceh to the echoes of Mussolini s Fascist Italy by way of the decolonization of sites in Australia New Zealand Colombia and Africa the processes of landscape contestation are innovatively teased out by established and newly emerging scholars This book should be of interest to any scholar interested in the politics of mnemonic landscapes

Meaningful Pasts Russell Johnston, Michael Ripmeester, 2024-01-31 In Meaningful Pasts Russell Johnston and Michael Ripmeester explore two strands of identity making among residents of the Niagara region in Ontario Canada First they describe the region s official narratives most of which celebrate the achievements of white settlers with a mix of storytelling rituals and monuments Despite their presence in local lore and landmarks these official narratives did not resonate with the nearly one thousand residents who participated in five surveys conducted over eleven years Instead participants drew on contemporary people places and events Second the authors explore the emergence of Niagara s wine industry as a heritage narrative The book shares how the survey participants embraced the industry as a local identifier and indicates how the industry s efforts have rekindled the residents interest in agriculture as a significant element of regional heritage and local identities Revealing how the profiles of local narratives and commemorations become entwined with social cultural economic and political power Meaningful Pasts illuminates the fact that local narratives retain their relevance only if residents find them meaningful in their day to day lives

Moral Regulation and Governance in Canada Amanda Glasbeek, 2006 Moral Regulation and Governance in Canada offers an outstanding selection of readings that represents an overview of the key issues in deviance moral regulation and governance in Canada from a distinctly Canadian perspective It effectively tracks the sociology of deviance from governmentality studies to theories of social control Of particular note is the focus this book gives to gender issues It also argues that sometimes what is considered deviant is less related to criminality and more concerned with the perception of normalcy
