Children who are externally directed make decisions based on the peer groups, violent movies, sexually explicit television shows and rap lyrics that permeate their lives. When children are self-directed, on the other hand, they use their power of reason like a sword to cut through the jungle of external influences. Fortunately, the author shows us it is never too late to foster in our children the ability to weigh options, consider sources and think for themselves. Filled with real life examples, humorous anecdotes and countless interviews with parents, children and teachers, *Raising Children Who Think for Themselves* identifies the five essential qualities of self-directed children, outlines the seven strategies necessary for parents to develop these qualities in their children, addresses nearly one hundred child-raising challenges from body piercing to whining wars and offers solutions to help encourage self-direction. **Raising Children Who Think for the mselves (EasyRead Super Large 20pt Edition)** , **Motivation and Experience in Foreign Language Learning** Yoshiyuki Nakata, 2006. Originally presented as the author's thesis, Ph.D. University of Dublin Trinity College. **Jesus Didn't Fit In: Raising Nontraditional Children** Janet L. Jackson, 2013-10. Why do so many adults today struggle trying to fit in when it comes to their careers and relationships? Why do so many of us think we do not measure up? Measure up to what and according to whose expectations? Could these feelings stem from childhood? Could parents inadvertently be instilling these thoughts in our children due to some unwritten rule of what is normal or traditional? Jesus' life portrays an excellent example of accepting oneself and others as unique children of God created for a purpose. This book will encourage parents of children who have struggled with fitting in to embrace their uniqueness and trust Christ instead of the

world **IMPROVING SCHOOLS FOR AFRICAN AMERICAN STUDENTS** Sheryl J. Denbo, Lynson Moore

Beaulieu, 2002-01-01 Improving Schools for African American Students is designed to provide educational leaders with a better understanding of how to recognize the diversity of strengths that Black students bring with them to school and how to use these strengths to improve achievement. The articles contained in this book discuss generic education issues such as policy reform, the importance of high quality teaching, and the improvement of schools from the perspective of the academic achievement of African American students. Part I explores institutional racism in the context of America's public schools and provides suggestions for educational leaders to eliminate harmful policies and practices within educational institutions and settings. Part II discusses the kinds of institutional and instructional changes that are needed to support successful schooling of African American children and youth. Part III focuses on the challenges presented to African American students by the current high stakes testing environment that surrounds standards assessment and accountability. A review of the literature on schools that have succeeded in improving achievement for African American students at the elementary, middle, and high school levels, with districts moving towards narrowing the achievement gap, is included. This text examines a wide variety of policies, programs, practices, and research that will provide valuable insight. The emphasis throughout the book is on the ability of educators to successfully restructure their schools, offer high quality teaching and learning standards for African American students, and to make the kinds of changes that will result in high achievement for all students.
