15th Century:

What happened in 15th Century Dr. Hau B Lau, 2025-08-09 15th Century The Dawn of Global Transformation captures one of history's most pivotal centuries when isolated civilizations began to connect and the foundations of the modern world took shape. This comprehensive volume explores the dramatic century from 1400 to 1500 when Ming China's treasure fleets dominated Asian seas, Islamic empires controlled vast trade networks, and European explorers began their tentative steps into the Atlantic. The book examines the profound transformations that reshaped human civilization: the fall of Constantinople that ended a thousand-year empire, the Spanish Reconquista that expelled Muslims and Jews from Iberia, the Wars of the Roses that redefined English monarchy, and the Portuguese explorations that would soon connect continents. Through detailed analysis of political upheavals, technological innovations, and cultural exchanges, readers discover how the 15th century set the stage for the Renaissance, the Age of Exploration, and global interconnectedness. From the sophisticated urban centers of Florence and Constantinople to the agricultural innovations transforming peasant life, from the mystical writings of religious women to the revolutionary art of Brunelleschi and Donatello, this volume presents a nuanced portrait of a world in transition. The narrative explores how different societies adapted to the Little Ice Age, how banking families like the Medici revolutionized finance, and how the printing press began to democratize knowledge. Special attention is given to the complex interactions between civilizations: Chinese maritime expeditions reaching Africa, Islamic commercial networks spanning three continents, and European colonial experiments in the Atlantic islands. The book also examines the human cost of these transformations, from the conquest of the Canary Islands to the persecution of religious minorities. 15th Century demonstrates how this remarkable century witnessed the emergence of centralized monarchies, the revival of classical learning, the expansion of global trade networks, and the technological innovations that would reshape warfare, navigation, and communication. It reveals how the foundations laid in the 1400s, from Portuguese caravels to humanist education, from Ottoman military might to Florentine artistic genius, created the conditions for the explosive changes of the following centuries. This volume is essential reading for anyone seeking to understand how the medieval world transformed into the early modern era and how the choices made in the 15th century continue to influence our interconnected world today.

Studies in English Trade in the 15th Century Eileen Power, M.M. Postan, 2013-11-05 Of all the activities of the most neglected century in English History, England's trade has received the least attention in proportion to its importance. It was obviously in the course of the later Middle Ages and more particularly in the fifteenth century that there took place the great transformation from medieval England, isolated and intensely local, to the England of the Tudor and

Stuart age with its world wide connections and imperial designs It was during the same period that most of the forms of international trade characteristic of the Middle Ages were replaced by new methods of commercial organization and regulation national in scope and at times definitely nationalistic in object and that a marked movement towards capitalist methods and principles took place in the sphere of domestic trade Yet little has been written concerning English trade in this period First published in 1933 this classic volume goes a long way to fills this gap superbly There is an abundance of material and the writers have compiled a statistical analysis of the Enrolled Customs Account from 1377 1482 which provides an essential measure of the nature volume and movement of English foreign commerce during the period *Politics, Conflict and the Monastic Topography of 15th-Century Constantinople* Nicholas Melvani, 2025-08-29 This study of Constantinople s monasteries within their urban framework during the last decades of Byzantium 1394 1453 explores the activity of monks nuns and affiliated laypeople such as patrons just before the city s Ottoman conquest and transformation into the capital of an Islamic Empire The book captures aspects of Byzantine institutions social and economic networks scholarly and artistic activity spiritual trends and the city s appearance during its final phase as the capital of the Byzantine Empire when culture and religious life were caught between the Italian Renaissance and the Ottoman expansion The Byzantine capital was merely the nucleus of a city state but still preserved a part of its imperial heritage and memories of its past glory The chapters tell the story of Constantinople at the moment the city s monuments and built environment left their final mark on the landscape on the shores of the Bosphorus These fresh insights into Byzantine religious cultural and urban history and updated picture of one of the most legendary cities of the Middle Ages and the Early Modern period will appeal not only to scholars and students of Byzantine and Ottoman culture but also to anyone interested in the entangled world of the Eastern Mediterranean *Civilization and Capitalism, 15th-18th Century, Vol. II* Fernand Braudel, 1992-12-23 By examining in detail the material life of pre industrial peoples around the world Fernand Braudel significantly changed the way historians view their subject Volume I describes food and drink dress and housing demography and family structure energy and technology money and credit and the growth of towns **From Old English to Standard English** Dennis Freeborn, 1998 Dennis Freeborn traces the development of the English language from Old English through Middle and Early Middle English to the establishment of standard English in the 18th century *Politics, Patronage and the Transmission of Knowledge in 13th - 15th Century Tabriz* Judith Pfeiffer, 2013-11-07 In *Politics Patronage and the Transmission of Knowledge in 13th 15th Century Tabriz* an international group of specialists from different disciplines investigate the role of Tabriz as one of the foremost centres of learning cultural productivity and politics in post Mongol Iran and the Middle East While standard accounts of Islamicate history have long presented the 13th to 15th centuries as the bottom of the decline paradigm of old the present volume demonstrates the vibrancy and originality of the intellectual and cultural production of this period by focusing on Tabriz among other capitals of the region The volume particularly explores the transmission of knowledge and institutional
