## 1914 The Battles In The West:

British Generalship on the Western Front 1914-1918 Simon Robbins, 2004-12-21 This book explores the British Army's response on the Western Front to a period of seminal change in warfare. In particular, it examines the impact of the pre-war emphasis on worldwide garrison occupation and policing duties for the Empire's defence of the mindset of the Army's leadership and its lack of preparation for a continental war involving a massive unplanned increase in men and material. The reasons for the poor performance in the early years of the war, notably professionalism within the British Army including poor staff work, trade unionism, careerism within the high command, and the tendency of an overconfident hierarchy to ignore the need for reform to tackle the tactical stalemate prior to 1916, are analysed. The high command rapidly learnt from the defeats of 1915-16 and performed much better in 1916-18, an especially formative period resulting in the promotion of a younger, more professional leadership and the development of the first truly modern system of tactics, which has dominated wars ever since. During 1917-18, the Army's commanders and staff evolved and improved these new methods, developing a doctrine of combined arms to overcome the tactical stalemate bedevilling Allied offensives. **1914** Trevor Nevitt Dupuy, 1967 An account of World War I on land, sea, and in the air. Western Front Companion, 1914-1918 John Laffin, 1997-05-22 An A to Z source to the battles, weapons, people, places, and other information about the First World War. Victoria Crosses on the Western Front - Battles of the Hindenburg Line - Canal du Nord Paul Oldfield, 2023-10-12 In the past, while visiting the First World War battlefields, the author often wondered where the various Victoria Cross actions took place. He resolved to find out. In 1988, in the midst of his army career research for this book, commenced, and over the years, numerous sources have been consulted. Victoria Crosses on the Western Front: Battles of the Hindenburg Line - Canal du Nord is designed for the battlefield visitor as much as the armchair reader. A thorough account of each VC action is set within the wider strategic and tactical context. Detailed sketch maps show the area today, together with the battle lines and movements of the combatants. It will allow visitors to stand upon the spot or very close to where each VC was won. Photographs of the battle sites richly illustrate the accounts. There is also a comprehensive biography for each recipient, covering every aspect of their lives: war and all parents and siblings, education, civilian employment, military career, wife and children, death and burial, commemoration. A host of other information, much of it published for the first time, reveals some fascinating characters with numerous links to many famous people and events. **Library of Congress Subject Headings** Library of Congress, 2004. From our earliest days, conflict has been the single most common characteristic of humanity. Man has fought man, and men have fought men on every continent.

every ocean and every island from the moment one set eyes on the other Be this xenophobia or be this a form of insanity is difficult to tell In any case the difference is lost amid the bombastic sounds of war The weapons themselves are of little consequence be they bare hands clubs knives swords spears arrows muskets machine guns or atomic bombs The end remains the same lives are lost like a sputtering candle guttering in the wind with darkness having the final word We can easily enough research each of the thousands of battles between one group on this sad earth and another Countries have fought countries and people people since before we began keeping count We don t need this book or any like it to recount the history of these terrible conflicts Beat The Drum Slowly instead delves into the underlying nature and motivations driving human kind toward war and murder We look beneath the facile explanations and histories offered by conquerors the losers seldom get a say and attempt to peel away the layers of rationalization lies and hypocrisy The question is what is it in humanity compelling us to engage in wholesale murder of our fellow man Of course it does superficially seem to be a blood sport engaged in mostly by men Perhaps the culprit is testosterone Women don t seem to be driven to dress up in silly uniforms parade around to martial music and then run out screaming for blood do they From what we have observed this seems a valid point Those women who do go in for this kind of thing often have as much hair on their chins as the men they emulate Of course unless every country in the world placed women into every possible governmental position giving the female of the species complete and total power over everything we will never know Such is about as unlikely to happen as a vegan snarling up a bloody steak the world will have to wait until some time in the future to see how that would work out In the real world men are stronger than women and men are highly competitive and combative Men fight for power and never willingly give it up Seeing things in this light it is completely understandable as to why the world is governed by men Men fight for survival dominance money religion race patriotism real estate and revenge This book examines each of these motivating factors with the purpose being to explain to ourselves and our readers exactly what in holy hell is wrong with us If the best way we have devised over thousands of years to settle differences is warfare then it does seem that mankind is doomed Sooner or later one side or another will design and field the ultimate weapon and with our historical inability to foresee the future consequences of our actions it is entirely likely that we will have finally managed to destroy all human life Probably the animals and other creatures of the earth will be rejoice over this Is it at all possible that we can learn to settle our differences using our intellect and common sense or are we a doomed species This is the question we examine and try to answer in this book Regardless of the means one uses to bring death war is by man s hand whether driven by religion murder etc To study the countless wars throughout history trying to ascertain a cumulative total of deaths caused by war would take days weeks or even months Outside of war murder and other direct causes of death we are our own worst enemy With the ability to annihilate the earth with the press of a button man s potential to end the lives o **Information Bulletin** ,1942

**Readers' Guide** ,1915 **20 Battles** Evert Kleynhans,David Brock Katz,2023-07-28 Favours manoeuvre over attrition and often punching above their weight South African soldiers have become known for their tenacity dash and ability to defy the odds Their unique directive command style has also helped them to excel in defining battles and operations from the campaign in German South West Africa in 1915 to the cross border operations in Angola during the Border War In 20 Battles military historians Evert Kleynhans and David Brock Katz investigate the evolution of South Africa's armed forces over a century from 1913 to 2013 They track the evolution of the doctrine and structure of the defence force uncovering historical continuity and the lessons learned from past battles and operations What is clear is that when South African soldiers have the freedom to operate according to their manoeuvre doctrine as they had in East Africa in 1916 and southern Ethiopia in 1941 they can achieve stunning results But when hemmed in by rigid doctrine and a top down command style as at Delville Wood in 1916 and Tobruk in 1942 the results can be tragic 20 Battles combines both battlefield drama and crisp analysis and in the process provides a much needed perspective on the South African way of war *Battle Tactics of the Western Front* Paddy Griffith,1996-01-01 Historians have portrayed British participation in World War I as a series of tragic debacles with lines of men mown down by machine guns with untried new military technology and incompetent generals who threw their troops into improvised and unsuccessful attacks In this book a renowned military historian studies the evolution of British infantry tactics during the war and challenges this interpretation showing that while the British army's plans and technologies failed persistently during the improvised first half of the war the army gradually improved its technique technology and eventually

its self assurance By the time of its successful sustained offensive in the fall of 1918 says Paddy Griffith the British army was demonstrating a battlefield skill and mobility that would rarely be surpassed even during World War II Evaluating the great gap that exists between theory and practice between textbook and bullet swept mudfield Griffith argues that many battles were carefully planned to exploit advanced tactics and to avoid casualties but that breakthrough was simply impossible under the conditions of the time According to Griffith the British were already masters of storm troop tactics by the end of 1916 and in several important respects were further ahead than the Germans would be even in 1918 In fields such as the timing and orchestration of all arms assaults predicted artillery fire Commando style trench raiding the use of light machine guns or the barrage fire of heavy machine guns the British led the world Although British generals were not military geniuses says Griffith they should at least be credited for effectively inventing much of the twentieth century s art of war Before Endeavours Fade Rose E.
