1938 and The Consequences:

Mid-Century Modern - Visionary Furniture Design from Vienna Caroline Wohlgemuth, 2021-12-31 Visionary furniture design from Vienna In 1938 Vienna lost its best and most creative minds This rupture was manifested in all of the arts and sciences and its mark is felt to this day not least in the field of furniture design With inexhaustible creativity the Jewish furniture designers who were forced to flee Vienna continued to work while in exile They taught at the best universities and spread their ideas and vision throughout the entire world Their creations became classics of twentieth century furniture design the epitome of mid century modern style This book honors the memory of the exiled designers with a thorough overview of their work It details their life stories and their visionary designs which remain as relevant and contemporary as ever and brings to light new aspects of the history of Viennese furniture design A new history of Viennese furniture design with 27 detailed biographies Numerous previously unpublished photographs and sketches Including works by Friedl Dicker Brandeis Martin Eisler Josef Frank Friedrich Kiesler Richard Neutra Bruno Pollak Margarete Sch tte Lihotzky Franz Singer Ernst Schwadron among others The Nature of Radioactive Fallout and Its Effects on Man: June 4-7, 1957. pp. 1009-2065 United States. National Oceanic and Atmospheric Administration, 1971 **Varying Gravity** Helge Kragh, 2016-02-05 The main focus of this book is on the interconnection of two unorthodox scientific ideas the varying gravity hypothesis and the expanding earth hypothesis As such it provides a fascinating insight into a nearly forgotten chapter in both the history of cosmology and the history of the earth sciences The hypothesis that the force of gravity decreases over cosmic time was first proposed by Paul Dirac in 1937 In this book the author examines in detail the historical development of Dirac s hypothesis and its consequences for the structure and history of the earth the most important of which was that the earth must have been smaller in the past *Caraleigh* Steven A. Hill, 2022-05-13 The Caraleigh neighborhood in south Raleigh was founded in 1892 with the opening of a cotton mill fertilizer plant and workers town The old textile complex with its immense brick structures continue to evoke a strong impression of a bygone period The old mill remains the community s focal point as of 2022 leading some to worry that Caraleigh s modernized structure may conceal dark secrets After the Civil War cotton mills were at the heart of the South s frenzied pursuit of economic and psychological regeneration between 1880 and 1915 As Raleigh s greatest textile venture Caraleigh itself was founded by a group of cotton investors The origins of

Raleigh's north-south divide can be seen in the many economic, psychological, social, and political perils. While the Downtown South project promises a bright future for Raleigh in 2022, a close examination of the city's economic and social stratification in the past reveals the city's inequality, resulting in an affluent north Raleigh and a pauperized south Raleigh ghetto. This work illuminates previously unrecognized aspects of Raleigh's history, such as how an outskirts neighborhood shaped the city's development during the twentieth century.

Comprehensive Handbook of Psychopathology Henry E.

Adams, 2013-12-18 The major purpose of this handbook is to provide a comprehensive review of current clinical descriptions, research, and theories of psychopathology. Descriptive psychopathology is a field that is the foundation of clinical practice and research in clinical psychology, psychiatry, psychiatric social work, psychiatric nursing, and allied professions in mental health. Psychopathology is often perceived as a stepchild of the more glamorous areas of diagnosis or assessment and therapy or behavioral change. Nevertheless, it is doubtful that any meaningful advancements in these areas will occur until there is a thorough understanding of the behavioral disorders. The purpose of the present project was to devise a handbook that covered both general and specific topics in psychopathology and that would be useful to researchers, practitioners, and graduate or other advanced students in the mental health professions. In order to implement this plan, we selected very carefully colleagues whom we respect for their expertise in particular fields. These include both clinicians and researchers with outstanding national reputations, as well as more junior behavioral scientists and clinicians who, in our opinion, will achieve similar recognition in the future. The chapters in this book lead us to believe that we have chosen wisely. We would like to express our appreciation to these authors for their outstanding contributions and cooperation.

Conceptual Profiles

Eduardo F. Mortimer, Charbel N. El-Hani, 2014-02-07 The language of science has many words and phrases whose meaning either changes in differing contexts or alters to reflect developments in a given discipline. This book presents the authors' theories on using conceptual profiles to make the teaching of context-dependent meanings more effective. Developed over two decades, their theory begins with a recognition of the coexistence in the students' discourse of those alternative meanings, even in the case of scientific concepts such as molecule, where the dissonance between the classical and modern views of the same phenomenon is an accepted norm. What began as an alternative model of conceptual change has evolved to incorporate a sociocultural approach by drawing on ideas such as situated cognition and Vygotsky's influential concept of culturally located learning. Also informed by pragmatist philosophy, the approach has grown into a well-rounded theory of teaching and learning scientific concepts. The authors have taken the opportunity in this book to develop their ideas further, anticipate and respond to criticisms, that of relativism, for example, and explain how their theory can be applied to analyze the teaching of core concepts in science, such as heat and temperature, life and biological adaptation. They also report on the implementation of a research program that correlates the responsiveness of their methodology to all the main developments in the field of science education. This additional material will inform academic discussion, review, and further enhancement of their theory.

and research model **Philosophy, Learning and the Mathematics Curriculum** Xuehui Xie, Phil Francis Carspecken, 2019-02-18 Mathematics curriculums used in progressive classrooms of the United States and in classrooms of the People's Republic of China presuppose markedly different philosophies Xie and Carspecken reconstruct different assumptions operating implicitly within mathematics curriculums developed by the Ministry of Education in China and NCTM in the United States Each curriculum is constructed upon a deep structure holistically integrating presuppositions about the nature of the human self society learning processes language concepts human development freedom authority and the epistemology and ontology of mathematical knowledge Xie and Carspecken next present an extended discussion of the two main philosophical traditions informing these curriculums dialectical materialism in the case of the Chinese mathematics curriculum and Dewey's instrumental pragmatism in the case of NCTM Both philosophies were developed as movements out of Hegelian idealism while retaining the anti dualist and anti empiricist insights of Hegel's thought The history of dialectical materialism and Dewey's instrumentalism is carefully examined by the authors to identify both similarities and sharp differences in the resulting mature philosophies Drawing upon more recent philosophies of intersubjectivity Brandom Habermas and dialectical materialist psychologies Vygotsky Luria the authors conclude this book with arguments for overcoming the limitations of a purely instrumentalist framework and for expanding potentialities implicit within dialectical philosophies This book will be of value to a broad audience including mathematics educators philosophers curriculum theorists social theorists and those who work in comparative education and learning science
