understand people we might need to appreciate or in some way sympathetically reconstruct the reasons that led a person to act in a certain way By comparison when it comes to understanding natural events like earthquakes or eclipses no appreciation of reasons or acts of sympathetic reconstruction is arguably needed mainly because there are no reasons on the scene to even be appreciated and no perspectives to be sympathetically pieced together This volume brings together some of the world s leading philosophers psychologists and theologians in order to shed light on the various ways in which we understand the world pushing debates on this issue to new levels of sophistication and insight The Literary Panorama, and National Register ,1810 **Library Literature** H.W.
