Carroll,R.F Bud,2012-12-06 This study is an outgrowth of our interest in the history of modern chemistry The paucity of reliable quantitative knowledge about past science was brought home forcibly to us when we undertook a research seminar in the comparative history of modern chemistry in Britain Germany and the United States That seminar which took place at the University of Pennsylvania in the spring of 1975 was paralleled by one devoted to the work of the Annales School The two seminars together catalyzed the attempt to construct historical measures of change in aspects of one science or chem ical indicators The present volume displays our results Perhaps our labors may be most usefully compared with the work of those students of medieval science who devote their best efforts to the establish ment of texts Only when acceptable texts have been constructed from fragmentary and corrupt sources can scholars move on to the more satisfying business of making history So too in the modern period a necessary pre liminary to the full history of any scientific profession is the establishing of reliable quantitative information in the form of statistical series This volume does not offer history Instead it provides certain element indicators that may be useful to individuals interested in the history of American chemistry and chemical industry and suggestive for policy *Technological Revolutions and the Periphery* Eduardo da Motta e Albuquerque,2023-10-13 This book evaluates the uneven propagation of technological revolutions investigating the roots of this phenomenon in the absorptive capabilities that are built by countries and regions at the periphery To understand this global process this book looks to two dimensions time and geography Temporally the book follows the sequence of technological revolutions in the last 250 years With regard to geography the book studies five different regions at the periphery China India Africa Russia and Latin America to understand how they differ in the institutional processes that shape their absorptive capabilities Focusing on each technological revolution and its impact on those five peripheric regions the chapters illustrate how each region coped with each shock wave emanating from the center Providing a truly global outlook of a complex system with a dynamic nature this book will be of interest to researchers and students of development economics the economics of innovation evolutionary economics and the economics of science and technology **The Encyclopaedia Britannica** ,1899 *The Encyclopedia Britannica* ,1890 **The Encyclopaedia Britannica** Thomas Spencer Baynes,1882 □□□□□□□□□□ ,1982 *The Encyclopaedia Britannica* ,1876 *The Encyclopædia Britannica* ,1891 **Transitions and Transformations in the History of Religions** Reynolds,TH.M.
