1980 Yearbook Of Astronomy:

Outer Space Wearing an RAF Blazer! Martin Mobberley,2013-07-23 To British television viewers the name Patrick Moore has been synonymous with Astronomy and Space Travel since he first appeared on The Sky at Night in 1957 To amateur astronomers he has been a source of inspiration joy humour and even an eccentric role model since that time Most people know that his 55 years of presenting The Sky at Night is a world record but what was he really like in person What did he do away from the TV cameras in his observatory and within the British Astronomical Association the organisation that inspired him as a youngster Also precisely what did he do during the War Years a subject that has always been shrouded in mystery Martin Mobberley a friend of Patrick Moore s for 30 years and a former President of the British Astronomical Association has spent ten years exhaustively researching Patrick's real life away from the TV cameras His childhood RAF service tireless voluntary work for astronomy and charity and his endless book writing are all examined in detail His astronomical observations are also examined in unprecedented detail along with the battles he fought along the way and his hatred of bureaucracy and political correctness No fan of Sir Patrick Moore can possibly live without this work on their bookshelf

Journal for the History of Astronomy ,1981 **The Strolling Astronomer** ,1979 *Literature 1989, Part 1* Astronomisches Rechen-Institut,2013-11-11 From the reviews Astronomy and Astrophysics Abstracts has appeared in semi annual volumes since 1969 and it has already become one of the fundemental publications in the fields of astronomy astrophysics and neighbouring sciences It is the most important English language abstracting journal in the mentioned branches The abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the

whole extended material The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences As such it represents a necessary ingredient of any astronomical library all over the world Space Science Review Dividing the whole field plus related subjects into 108 categories each work is numbered and most are accompanied by brief abstracts Fairly comprehensive cross referencing links relevant papers to more than one category and exhaustive author and subject indices are to be found at the back making the catalogues easy to use The series appears to be so complete in its coverage and always less than a year out of date that I shall certainly have to make a little more space on Compendium of Practical Astronomy Günter D. those shelves for future volumes The Observatory Magazine Roth, 2012-12-06 It is a pleasure to present this work which has been well received in German speaking countries through four editions to the English speaking reader We feel that this is a unique publication in that it contains valuable material that cannot easily if at all be found elsewhere We are grateful to the authors for reading through the English version of the text and for responding promptly for the most part to our queries Several authors have supplied us on their own initiative or at our suggestion with revised and updated manuscripts and with supplementary English references We have striven to achieve a translation of Handbuch for Sternfreunde which accurately presents the qualitative and quantitative scientific principles con tained within each chapter while maintaining the flavor of the original Ger man text Where appropriate we have inserted footnotes to clarify material which may have a different meaning and or application in English speaking countries from that in Germany When the first English edition of this work Astronomy A Handbook translated by the late A Beer appeared in 1975 it contained 21 chapters This new edition is over twice the length and contains 28 authored chap ters in three volumes At Springer's request we have devised a new title Compendium of Practical Astronomy to more accurately reflect the broad spectrum of topics and the vast body of information contained within these pages Astronomy Education Materials ,1982

Scientific and Technical Books and Serials in Print ,1984 Astronomy and Astrophysics Abstracts S. Böhme, W. Fricke, H. Hefele, I. Heinrich, W. Hofmann, D. Krahn, V. R. Matas, L. D. Schmadel, G. Zech, 2013-12-14 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documenta tion of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumu lating abstracts for about six months offers the advantage of greater convenience for the user Volume 31 contains literature published in 1982 and received before July 15 1982 some older literature which was received late and which is not recorded in earlier volumes is also included We acknowledge with thanks

contributions to this volume by Dr J Bouska Prague who surveyed journals and publications in Czech and supplied us with abstracts in English Who's Who In The Moon Brian Jones, 2024-12-30 Who s Who in the Moon is aimed not only at the beginner or near beginner but also at the backyard astronomer who is perhaps experienced in other areas of observation but who has decided to spend more time considering the Moon as an alternative target The book provides a visual introduction to our closest celestial neighbor opening with an introductory section which details both with the history of lunar mapping and naming of lunar formations as well as providing useful information on observing the lunar surface and what observers can realistically expect to see when they look at the Moon with the naked eye binoculars or a small medium telescope The introductory section is followed by a lengthy series of images including not only wide field panoramic views but also a large number of more detailed images showing close up views of different areas of the Moon and featuring individual craters mountains valleys and much more Many of the individual features shown on these images are identified by name and are accompanied by biographical sketches relating to the men and women after whom they are named This is a non technical up close and personal visual look at the Earth's only natural satellite and many of the individual features scattered across its surface Rather than offering itself as a full and exhaustive guide to the lunar surface A Guide to the Moon is more of a vade mecum which enables and hopefully encourages the reader to become more acquainted with the lunar landscape on a personal level with a view to learning more about the astronomers and other scientists whose names are immortalised by having lunar features named after them Who s Who in the Moon was inspired by and is a tribute to a Memoir published by the British Astronomical Association BAA in 1938 entitled Who s Who in the Moon written by Mary Evershed the first Director of the BAA Historical Section The biographical notes in A Guide to the Moon include examples of those penned by Mary Evershed in her original publication The Cumulative Book Index ,1990 A world list of books in the English language

Kelley, Eugene F. Milone, 2005-12-06 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 the lion horoscope or the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history
