Tracing the lives and works of five women in four case studies author Marie Meyerding examines the representation of women in the field of photography in South Africa in the second half of the twentieth century All of them are critically understudied with no existing scholarship dedicated exclusively to their photographic contributions Focusing on the representation of women on two different levels as agents behind the camera and as subjects in photographs it showcases women photographers portraying their female contemporaries and analyses to what extent they adhered to or subverted common forms of gender representation In recuperating their forgotten archives the book argues that none of these women are marginal figures but rather that each of them played a leading role in the field of photography in their own time The book will be of interest to scholars working in art history history of photography gender studies intersectionality and African studies

Photographs and Architecture Micheline Nilsen, 2017-07-05 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic

Statistical Reference Index ,1980 From Snapshots to Social Media - The Changing Picture of Domestic

Photography Risto Sarvas, David M. Frohlich, 2011-02-09 From Snapshots to Social Media describes the history and future of domestic photography as mediated by technological change Domestic photography refers to the culture of ordinary people capturing sharing and using photographs and is in a particular state of flux today as photos go digital The book argues that this digital era is the third major chapter in the 170 year history of the area following the portrait and Kodak eras of the past History shows that despite huge changes in photographic technology and the way it has been sold people continue to use photographs to improve memory support communication and reinforce identity The future will involve a shift in the balance of these core activities and a replacement of the family album with various multimedia archives for individuals families and communities This raises a number of issues that should be taken into account when designing new technologies and business services in this area including the ownership and privacy of content multimedia standards home ICT infrastructure and younger and older users of images The book is a must for designers and engineers of imaging technology and social media who want a better understanding of the history of domestic photography in order to shape its future It will also be of value to students and researchers in science and technology studies and visual culture as a fascinating case study of the evolving use of photographs and photographic technology in Western society
