**Salt Water Neighbors** Ted L. McDorman, 2009 The United States and Canada are salt water neighbors on the Atlantic Pacific and Arctic Oceans Despite the general closeness of the political economic and social relationship the two States have approached their offshore areas from different perspectives Canada has long supported expansion of exclusive national control over its adjacent offshore whereas the United States has been concerned with the balance between national authority and international navigation rights Canada has tended to view maritime disputes with the United States as local matters whereas the United States has tended to see the disputes with Canada in global terms Against this background *Salt Water Neighbor* examines both the international ocean law

disagreements that exist between the United States and Canada respecting maritime boundaries fisheries and navigation rights e g the Northwest Passage and the numerous cooperative bilateral arrangements that have prevented these disputes from being significant causes of friction between the neighbors There has not been a comprehensive book length study of United States Canada international ocean relations since the early 1970s Much has changed in the last 30 years Most importantly the law and the nature of the disputes between the two States have changed as a result of the adoption of 200 nautical mile zones in the late 1970s

**The Rights of Indigenous Peoples in Marine Areas** Stephen Allen,Nigel Bankes,Øyvind Ravna,2019-09-19 The question of what rights might be afforded to Indigenous peoples has preoccupied the municipal legal systems of settler states since the earliest colonial encounters As a result of sustained institutional initiatives many national legal regimes and the international legal order accept that Indigenous peoples possess an extensive array of legal rights However despite this development claims advanced by Indigenous peoples relating to rights to marine spaces have been largely opposed This book offers the first sustained study of these rights and their reception within modern legal systems Taking a three part approach it looks firstly at the international aspects of Indigenous entitlements in marine spaces It then goes on to explore specific country examples before looking at some interdisciplinary

themes of crucial importance to the question of the recognition of the rights of Indigenous peoples in marine settings Drawing on the expertise of leading scholars this is a rigorous and long overdue exploration of a significant gap in the literature     **International Journal of Maritime History** ,2007     **North America's Environment** ,2002 At head of title A regional product of the Global Environment Outlook 3 report process     *Michigan Journal of International Law* ,2008
