The Law of EU External Relations Pieter Jan Kuijper, Jan Wouters, Frank Hoffmeister, Geert De Baere, Thomas Ramopoulos, 2015-11-19 The two years since publication of the first edition of *The Law of EU External Relations Cases Materials and Commentary on the EU as an International Actor* have been characterized by the large amount of case law on the new provisions on external relations which have found their way into the Lisbon Treaty. Moreover, there have been important changes in EU secondary law on external relations as a consequence of these changes to the Lisbon Treaty. In this second edition, new case law and legislative developments are critically discussed and analysed in this comprehensive collection of EU Treaty law. Combining chapters on the general basis of the Union's external action and its relation to international law with chapters which further explore the law and practice of the EU in the specialized fields of external action, this book presents the law of EU external relations in a concise and accessible manner for students, practitioners and academics in the field. Topics include the common commercial policy, development cooperation, cooperation with third countries, humanitarian aid, the enlargement and neighbourhood policies, the external environmental policy and the common foreign and security policy. Carefully selected primary documents are accompanied with analytic commentary on the issues they raise and their significance for the overall structure of EU external relations law. The primary materials selected include many important legal documents that are hard to find elsewhere but give a vital insight into the operation of EU external relations law in practice.

Large corporations have provided a fundamental contribution to the wealth of nations and at the same time have had a remarkable impact on the political and social systems within which they have

operated It is difficult to understand the development of the most advanced economies if we do not consider the specific evolution of big business in every national case On the other hand it is not possible to explain the shape and behavior of big business without considering its development as part of the history of the country in which they operate The largest US German British and French firms were key actors in favoring their nations development and even at the end of the Twentieth Century made a very important contribution to their growth In many countries a stable core of large corporations developed only relatively lately or did not develop at all and under these circumstances big business was not able to significantly participate in the economic growth of such countries Scholars who dealt with the economic history of Italy and Spain are generally unanimous in tagging these nations as industrial late comers ineffective in promoting big autochthonous private and State owned firms dominated by family companies and characterized by a strong competitive advantage on the part of small and medium sized enterprises At the same time Spanish and Italian business and economic historians have tended to say little about the role and features of big business This book thus fills a significant gap in the work on the development of Southern European capitalism and its large corporations by analyzing the Italian and Spanish cases and comparing them with each other and with what has occurred in the United States and in the largest European nations Examining both the macro dynamics national but also supra national and the micro level utilizing samples of big corporations and going deeply into some company cases this volume identifies some important protagonists of the Italian and Spanish economies such as the State families and foreign investors and investigates a wider panorama which includes the political economic and social relationships of the corporations providing insights into the form of capitalism that exists in these countries
